TO: #147-2, Mr. C. M. Howard, Jr. July 26, 1973

FROM: #149, Mr. J. T. Allen, Jr.

SUBJECT: Our File PL/WDLL/G - Westinghouse Corp. Request for OSHA Certification

We have received your memorandum of July 23, 1973 concerning the above matter. We attach the March 27, 1973, memorandum of Mr. Weidman concerning customer demands for OSHA certifications. The considerations outlined in that memorandum have not changed. Accordingly, the Legal Department could not approve the certification requested by Westinghouse.

However, it would be possible to draft a certification with respect to asbestos content in DURABOND. If you desire this, and Westinghouse will accept something along this line, we will be pleased to prepare a draft.
