DOCUMENT DESCRIPTION: Letter to Westinghouse from External Lab RE Animal Dust Experiments

[redacted]
[redacted]
[redacted]
E. North Ave.

[redacted], Pittsburgh, Pa.

December 23, 1936

Mr. Barnes,
Westinghouse Company,
East Pittsburgh, Pa.

Dear Mr. Barnes:

Dr. Haythorn tells me that you are anxiously awaiting the results of our experiments with dusts G-20, 21 and 22. If all had gone well, we were to have killed the last of the animals today. But unfortunately, two of the pigs died in November and the two which were substituted are not due to be autopsied until February.

Should you at any time care to stop at the hospital, we would be very glad to show you the sections of the animals which have been autopsied to date. Some of the nodules would interest you, I think.

Very sincerely yours,

Lucy Lemmer
