HURST DUAL/GATE FLOOR SHIFT CONVERSION KIT

for Automatic Transmissions

3 Speed Turbo-Hydro Shifter Includes
Hurst Styled and Engineered Console

3-9539

Highest quality shift conversion unit converts automatic transmission to manual control with the pull of a lever.

Gives you control as precise as a fully synchronized manual transmission.

Positive latching mechanism and neutral lock out takes guesswork out of gear changing. There's no chance of missing gears.

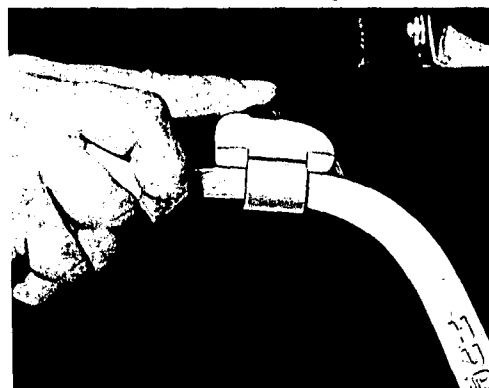

Check these other points: • Positive Downshift Stops • Reverse Inhibitor • Illuminated Selector Indicator • Chrome Plated Shift Lever • Wood Grained Escutcheon Plate.

Fits All Of The Following Without Factory Console:

Buick 1967 GS400
Chevrolet 1965-67 All (Ex.
Chevelle, Chevy II)
Chevelle 1967 SS396

Oldsmobile 1967 442
1965-66 Delmont
Pontiac 1967 GTD
1965-67 Catalina
1965-66 Bonneville

ROLL/CONTROL (LINE/LOC)

3-9544

An auxiliary component incorporated into the hydraulic braking system of your car. The Roll/Control system contains an electro-operated hydraulic control valve engineered to provide positive locking action to pre-selected wheels.

In normal street and highway operation the Roll/Control functions as a hill-holder, preventing your car from rolling backward as the clutch is being engaged.

In drag racing the Roll/Control enables you to hold your car precisely on the starting line, eliminating false starts and disqualifications. Check these additional features:

• Instantaneous Milli-Second Release. • Faster Out of the Chute. • Holds Constant R.P.M. at Line. • No Waiting for Brake Pedal Return. • Reduce E.T. • No Interference with Normal Brake Operation. • Easily Installed. • Dash Mounted "On" Light. • Stick Mounted Chrome "Hurst" Switch. • Switch Fits any Stick—Floor or Column.

**GREAT FOR MULTI-STOP VEHICLES AND
LIGHT TRUCKS**

CUSTOM KNOBS

Custom colored 1 1/8 in. knobs imprinted with either 3 or 4 speed patterns. Also available with velvet covering (no imprint). Fine thread.

3 SPEED

White—3-9552
