Fireproofing containing asbestos material

Harold Rosen, Chief Spec Writer of S-O-M, New York City, met with Dr. Selikoff last week and tells Allen that Dr. Selikoff is on the road to outlawing sprayed asbestos for fireproofing!!!!

Harold Rosen, when contacted by Allan Bessemer, confidentially advised him of all this and Harold Rosen was in the process, actually had outlawed sprayed asbestos fiber in many of his specifications and was in the process of outlawing it in all projects and including SOUND-SHIELD 85!!!! Allen advised him, again confidentially, that 85 had no asbestos in it and that problem was cured. Allen advised him that we are in the process of positioning ourselves for this new development, Harold Rosen said "wahn"??? Everyday means jobs, specifications etc. JAM Industries, Trenton, N.J., Mercer Hospital, S-O-M semantichous spec, don't know if they'll approve CAPCO BLAZE-SHIELD Type D!!!! We must move as rapidly as possible.
