DAVIS' COLORS IN OIL

4/5100/563

PERFECTLY PURE OIL COLORS

Unequalled in strength, durability, purity
of tone, uniformity and fineness.

No better colors can be made, no better
offered at any price.

FRES-CO-LITE

It is very easy to apply and extremely durable.

Is a scientific combination of both Oil and Varnish, that dries out with a beautiful soft flat finish, very elegant and refined in appearance, and restful to the eye.

It dries without showing laps or brush marks, when properly applied.

Usually one coat will be found sufficient to make a satisfactory finish if White or one of the paler tints is used.

DO NOT FORGET—FRES-CO-LITE may be washed with soap and water, thoroughly cleaned and restored to its original beauty if it should become soiled.

The covering capacity of FRES-CO-LITE varies according to the surface to be painted and its condition. You will also find that the White and Pale Tints will cover better than the deep tints

You may figure about as follows:—

350 to 500 square feet one coat over rough sand finished walls.

350 to 550 square feet over medium smooth surfaces.

400 to 600 square feet one coat over smooth surfaces.

Full directions for applying Fres-co-lite will be found on every package.

Contains no White Lead or other poisonous ingredients.

Flows freely under brush and covers densely, much more surface than the same amount of White Lead and Oil.

The White remains White, and the Tints are permanent

It levels out, and flats perfectly.

Is very elastic and will not peel nor flake off.

May be used over painted or calcimined surfaces, iron wood, plaster, burlap, canvas, concrete, etc.

Is made in White and eighteen attractive Tints and Colors.

Is far better than wall paper as it can be quickly and cheaply washed when it becomes soiled.

It a thoroughly sanitary finish for interior use.

Is soft and restful to the eye.

Reflects more light than gloss finishes, and is decidedly more elegant.

It is specially recommended for use in Hospitals, Churches, Schools, Public Buildings, Dairies, Sanitariums, Bakeries, Office Buildings, Libraries, Theatres, Bath Rooms and the Home.

FOR HOUSE PAINTING USE

KELLOGG IMPROVED BOILED PURE LINSEED OIL

THE Painter who uses "Kellogg Improved Boiled" can guarantee a longer-wearing, glossier job—one that will make folks say, "He's a good painter." It is ready-to-use for inside or outside work. Don't add anything to it. It dries in from 12-15 hours. It is absolutely PURE.

DO YOU KNOW ABOUT WINTER BOILED
FOR COLD WEATHER OUTSIDE WORK?

The Empire Wall Paper Company can supply you with
"Kellogg Improved Boiled." INCLUDE IT IN YOUR ORDER.

WHEELER WOOD FILLER

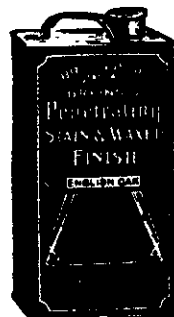

For more than forty years recognized as standard by all classes of trade. The only filler that forms a solid and permanent foundation in the pores of the wood for supporting the finishing coats.

Through perfect results secures for the Painter, Contractor, or Builder the most economical and satisfactory finish.

Bridgeport Standard Penetrating Stains

Preeminently the leading line of stains on the market. They do not lay on the surface of the wood, but penetrate deeply without raising the grain. All the beautiful markings of nature lost to the eye by the use of ordinary "dyes" are clearly brought out.

So simple and practical to use that many beautiful effects can be obtained on even the common woods used in the building trade. Their great covering and penetrating qualities make them the most economical and permanent.

These stains are particularly adapted for use in connection with Wheeler Wood Filler, producing the most modern and artistic effects in the decoration and preservation of woodwork.

If you are not already supplied with a set of our neat and handy panels showing Bridgeport Standard Wood Finishes, ask our Distributors for one, or write us direct.

IMPORTANT NOTICE

The prices quoted in this Catalogue are Market Prices the day the list goes to press, and are subject to change WITHOUT NOTICE.

Owing to the frequent market changes we have not quoted prices on the following, namely: Raw or boiled linseed oil, turpentines, strictly pure white leads, etc. These goods will be supplied at the lowest Market Prices and quotations will be furnished promptly on request.

We do not carry paints in barrels, half barrels, ten or five-gallon kegs, in stock. It will require five days for shipment direct from factory.

Special Prices, Terms and Agreements with Dealers or Agents who wish to put in a stock of Prepared Paints, Colors in Oil, Oils, Leads, Brushes, etc.

No goods sold on consignment.

Extra charge for cans where Oil, Turpentine, Alcohol, etc., are sold less than barrels. See can list.

TERMS

All goods listed in this Catalogue F. O. B. Syracuse, N. Y., unless otherwise arranged.

Our business is conducted upon a STRICTLY CASH BASIS. It is not a question of the honesty, responsibility, or reliability of the customer; but the principle on which we do business. We will, however, ship C. O. D. on request of the agent.

All orders to be shipped C. O. D. or subject to sight draft with Bill of Lading attached must be accompanied by remittance of at least 20% to cover risk of acceptance.

It is not our business to guess at anything, therefore always write your orders, shipping instructions, and names, plainly, and be sure to state whether shipments are to be made by express or freight.

All claims for shortage, deductions, etc., must be made within five days after receipt of goods.

We assume responsibility for all our goods up to the time they are receipted for in good order by the Transportation Companies, after which our responsibility ceases and all claims for damages, breakage or leakage should be made direct to them.

All our goods are warranted to be just as represented.

Upon request of agents and under proper conditions we will arrange to accept returns of all unbroken packages in good order, transportation charges prepaid, except stock orders and goods quoted at special market prices.

DISCOUNT TO AGENTS

NOTICE AND REMEMBER

Our Discount to Agents is 50 per cent or one-half off the printed price on all goods in this Catalogue except Oils, Turpentines and Pure White Leads, which are listed market prices. Quotations on request.

Make a memorandum of your discounts, then detach and destroy this slip.

INTRODUCTION

At no time in many years has our immense line of Wall Paper and General Supplies undergone such a marked change in comparison with other lines, and emerged with such credit to the management: a condition which will be evident to the most casual observer of our Sample Books and Catalogues for the coming season.

While we have endeavored here to list such articles and materials as are more uniformly called for, we have also included much which has been brought to our notice favorably since the last issue, and if aside from our own line, a want is experienced which we do not list, please remember that our services are ever at your disposal.

Many notable improvements have been applied with equal force to all departments, and nothing having a tendency to retard the correct and careful filling of orders, and the prompt shipment thereof, is tolerated. Unusual care is also taken in the selection of the goods we have to offer; prices are revised as condition or necessity may warrant at stated intervals, and with our well known policy of justice and fairness to all, we are confident of our ability to serve you with courtesy and benefit.

We wish to call your special attention to the Davis 100% Pure Paint. You will find the analysis and guarantee on every can and it conforms in every way with the pure paint law.

Some of the States have passed laws requiring that labels on cans of paints shall show just what is contained in the can, and it is probable that at no very distant date the United States Government will pass a paint law somewhat similar to the Pure Food Law, and on that account some of the manufacturers are now changing their formulas to meet the new conditions. We are happy to say that the H. B. Davis Company were the pioneers in making a pure paint, and it did not take the "BIG STICK" to compel them to show the public just what they were buying when they bought Davis 100% Pure Paint.

It is impossible to make too strong a claim for this paint. Every package of it that is shipped to you bears the absolute guarantee of the manufacturer, backed up by us, that it contains paint made from 100% pure lead (carbonate), 100% pure selected zinc, white (oxide) 100% pure old process linseed oil, including the necessary pure tinting colors and best turpentine dryer, and nothing else,—that is, it does not contain any sulphate of lead, barytes, silica, whiting, fish oil, nor any other cheap adulterant saving the manufacturer from \$80 to \$100 per ton and making them rich at your expense. Therefore, when you buy paint buy Davis 100% Pure. It goes farther, covers better, holds its gloss and wears longer than the adulterated paints or lead and oil, and on account of the addition of zinc will not chalk.

Thanking you for your past patronage and soliciting a continuance of same, we are,

Very truly yours,

EMPIRE WALL PAPER CO.

CAUTION

Agents are cautioned not to ask too high a price for the goods listed in this Catalogue.

This is an age of strong and keen competition and it will be found more profitable to do a good business at fair profits than to price your goods so high that you lose your sales.

It would be well to ascertain what your local dealers are asking and base your prices accordingly. We have listed as low as possible consistent with the quality of the goods and a fair living profit.

DAVIS' PAINT**PUREST PAINT MADE**

100 Per Cent Pure

SOLD UNDER GUARANTEE**ABSOLUTELY PURE, and Will Cover 400 Square Feet—Two Coats**

The covering capacity of Davis' 100 per cent Pure Paint is fully from 25 per cent to 50 per cent greater than hand-mixed white lead and linseed oil paint or impure prepared paints, and it wears from two to five times longer. It costs as much to apply a gallon of impure paint as it does a gallon of pure paint, and since the greatest cost in painting is the labor, you can readily figure the advantage of using Davis' 100 Per cent Pure Paint; besides, buildings painted with this paint retain their luster and freshness for years.

When other manufacturers and dealers claim their paint as good and pure as Davis' BEST, ask why a guarantee label showing contents does not appear on their packages as exhibited on every package of Davis' 100 Per Cent Pure Paint. Remember that materials which substitute basic carbonate of lead and oxide of zinc save paint manufacturers from \$80 to \$100 per ton. Why enrich the manufacturer at your expense?

Shown in 48 colors, also Outside White, Inside White, Black, Inside Flat White and Inside Varnish White.

ENGLISH PREPARED PAINT

A Pure Lead, Zinc and Linseed Oil Paint
And is composed of the most durable materials in such proportions as experience has shown will give most satisfactory results for general use. It is intended for all classes of interior and exterior work, and is well made. This grade is not as good as our Davis' 100 Per Cent Pure Paint, and does not have the same covering capacity or density, but will be found more durable and economical than most of the high-grade and so-called pure mixed paints on the market.

Put up in 30 durable shades, also Inside White, Outside White and Black, and will run uniform in color and quality.

DAVIS' OXIDE PAINT

For Barns, Roofs, Bridges, and Structural Iron Work

This is a high grade Oxide Paint, and we know it will give the best satisfaction.

It is prepared ready for use of carefully selected and tested oxides, finely ground and incorporated with Pure Linseed Oil, insuring a permanent, indestructible coating which excludes air and water, necessarily preventing rust and decay.

They are adapted for metal and shingle roofs.

As no harmful materials are used in their composition, the water collected from roofs painted with these paints may be safely used for domestic purposes.

Put up in gallon cans—eight durable and good wearing colors.

Send for card.

Pints, each	.60
Half pints, each	.40

BENJAMIN MOORE & CO.

Ready for Use

SANI-FLAT, in its wearing qualities, is superior to all others for the reason that only properly prepared and treated oil is used as a binder; there is absolutely no rosin or gum used in its composition, which causes similar coatings to crack, craze or alligator, particularly when used around windows or on surfaces subject to the rays of the sun, which is the real test for finishes of this character. A cheap rosin binder with a little China wood oil might temporarily answer the purpose and flat all right and apparently make a good job,

but after a few years, in order to repaint, it will be necessary to remove the coat. Therefore, the only safe finish to use is one made with an oil binder, such as SANI-FLAT, so as to forever keep elastic and offer a surface that may be painted over after a number of years of wear.

Directions for Using Sani-Flat

Shake the package well and after opening, stir the contents thoroughly from the bottom. Apply freely with a good-sized brush, and on walls lay off back and forth same as calcimine. If, from evaporation, Sani-Flat becomes too thick to work freely, add a little turpentine.

New walls, sheathing board or beaver board should first receive a coat of Impervo Size or Impervo Size and Sani-Flat mixed in equal proportions.

One coat of Sani-Flat applied after this priming coat is thoroughly hard is usually sufficient. For priming new wood add at least one pint of linseed oil to a gallon of Sani-Flat.

Old walls or woodwork that have been painted before require no preparation, one or two coats of Sani-Flat being sufficient, but in case of calcimined walls it is best to wash off the old material and treat same as for new walls.

Fill cracks in walls with putty made from whitening and Sani-Flat before first coat is applied and putty holes in woodwork between coats with the same material.

Sani-Flat can be applied over Burlap by first treating the surface with a coat of Impervo Size.

Steel Ceilings, Radiators, etc., can be finished with one or two coats and require no preparation.

As Sani-Flat undergoes a change in drying you cannot judge of the color until dry.

Any of the shades shown can be made lighter by intermixing with White Sani-Flat.

As Sani-Flat has a tendency to skin over when exposed to the air, care should be taken, after a package has been opened and not all used the same day, to properly cover it so as to exclude the air.

White	Pale Blue	Rich Green

FRES-CO-LITE

Contains no White Lead or other poisonous ingredients. Flows freely under the brush and

covers densely, much more surface than the same amount of white lead and oil. The White remains white, and the tints are permanent. It levels out, and flats perfectly. Is very elastic and will not peel nor flake off. May be used over painted or calcimined surfaces, iron, wood, plaster, burlap, canvas, concrete, etc. Is made in white and eighteen attractive tints and colors. Is far better than wall paper as it can be quickly and cheaply washed when it becomes soiled. Is a thoroughly sanitary finish for interior use. Is soft and restful to the eye. Reflects more light than gloss finishes, and is decidedly more elegant.

It is specially recommended for use in hospitals, churches, schools, public buildings, dairies, sanitariums, bakeries, office buildings, libraries, theatres, bath rooms and the home.

It is very easy to apply and extremely durable. Is a scientific combination of both Oil and Varnish, that dries out with a beautiful soft flat finish, very elegant and refined in appearance, and restful to the eye. It dries without showing laps or brush marks, when properly applied. Usually one coat will be found sufficient to make a satisfactory finish if White or one of the paler tints is used.

DO NOT FORGET—Fres-Co-Lite may be washed with soap and water, thoroughly cleaned and restored to its original beauty if it should become soiled.

The covering capacity of Fres-Co-Lite varies according to the surface to be painted and its condition. You will also find that the white and pale tints will cover better than the deep tints.

You may figure about as follows: 350 to 500 square feet one coat over rough sand finished walls; 350 to 550 square feet over medium smooth surfaces; 400 to 600 square feet one coat over smooth surfaces.

MURESCO

Beautiful, Durable, Sanitary

Mix with Boiling Water. Apply with a Brush To Painters and Decorators:

Since MURESCO was introduced in 1892 it has been used extensively in all parts of the United States. Property owners, architects, contractors, public officials, merchants, manufacturers and householders all recognize the superiority of MURESCO over kalsomine and other wall finishes.

MURESCO can be applied to new or old plaster, brick, stone, wood or metal. It is easily prepared and applied; covers and spreads well; will not crack, peel, or rub off. MURESCO is fire-proof and perfectly sanitary.

MURESCO is artistic: it produces a finish that has a soft, smooth, silky appearance which is very agreeable and restful to the eyes.

MURESCO dries out perfectly flat without spots, clouds or "flashing." It will not show laps or brush marks: one man can do a large job that would usually require several and a wall or ceiling can be gone over without washing off the previous coat. MURESCO can easily be washed off if required.

All wall finishes intended to be applied with a brush depend upon glue as a binder. Good glue can only be dissolved in hot water. The binding element of MURESCO consists of the best quality hide glue and it must be mixed in boiling

water, but may be applied hot or cold according to conditions. (See directions.)

MURES CO is adapted to all buildings. It has been used on private residences, hotels, apartment houses, churches, schoolhouses, public buildings, theatres, office buildings, stores, warehouses, mills, factories, breweries, machine shops, power stations, car sheds, stables, basements, etc. In all cases where an artistic, economical, convenient, durable, sanitary and fire-proof coating is required for interior use, MURES CO will give perfect satisfaction.

On metal, hardwood and smooth hard plaster surfaces, five pounds of MURES CO will cover 500 square feet one coat and cover it better with less labor than any other preparation.

On brick, sand and rough finished surfaces, five pounds of MURES CO will cover 300 to 350 square feet one coat.

Tinting White MURES CO contains no blue, being manufactured expressly for painters and decorators desiring to make their own tints; when used for white work a small quantity of Ultramarine Blue should be added.

XX White MURES CO is a perfectly pure white.

For mixing MURES CO for Relief, Stippling or Combing decorations see direction circular.

Send for color card.

Special Discount to the Trade

MURES CO FRESCO COLORS

Muresco Colors are superior to what are known as Fresco Colors and are used for the same purpose with much better results. They are ground fine, work easy, cover well, flow on smoothly and dry flat without clouds or flashing, making a clear, even, velvet-like surface.

Muresco Colors may be used with Tinting White, but each should be mixed separately and then added before the materials jell, so as to thoroughly incorporate and bring the desired shade.

Put up in sixteen handsome colors. Color card on application.

MURES CO SIZE

This is a new preparation manufactured expressly for the purpose of overcoming the porousness and dampness of the average plastered surface, and to prevent suction on such surfaces. A coat of this "size" forms a non-absorbent finish to which the paste used on wall hangings will firmly adhere, and it also forms a surface which is impervious to the moisture arising from plastered walls. It will not injure any ordinary colors or paper. It has more strength than the ordinary glue size, and it will be found much more convenient, as it is furnished in a dry, finely powdered condition which dissolves readily in boiling water, and it does not decompose rapidly like ground glue when mixed with water.

For Lincrusta Walton, Heavy Hand Pressed Papers and Burlaps, add a small quantity of Venice Turpentine. It will not peel or chip.

This "size" is especially adapted as a first coating for Muresco work, as it kills all suction and very rarely fails to make a surface over a water stain through which the stain does not penetrate.

One coat of Muresco over this "size" will cover a black surface when properly applied.

Directions for use furnished with each package.

IMPERVO SIZE

An oil size: dries semi-flat over night. One gallon covers 650 square feet.

This size is neutral to lime and acid, and is impervious to dampness: contains no rosin and is unequalled for use on old or new walls as an undercoating for either Muresco, Kalsomine, Sani-Flat or Oil Paint, or as a substitute for shellac filler on woodwork: in fact, its uses are universal.

A TRULY MAGIC WALL PAPER SIZE CARTER'S STRICTLY PURE WHITE LEAD

SEE HOW THIS SIZE DETECTS THE "HOT SPOTS"
(PATENT APPLIED FOR)

This size will dissolve in cold water. It is almost twice as strong as any prepared size on the market. Cheaper to use than glue. It instantly turns pink on a hot wall, otherwise it is colorless. It is no longer necessary to wait for hot water or to melt the size. A small can will do a large room. It is a foolish risk to hang wall papers of delicate tints on a wall which may be "hot" when this size will instantly tell you if the wall is unfit.

PRICE LIST

2-lb. can......80	1/4-lb. can......30

CLARK SIZE

Can be mixed quickly and easily in many times its own weight of cold water. It has no disagreeable odor.

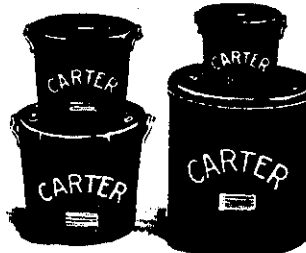

This sizing spreads smoothly and shows where the lime spots are by coloring them pink. It forms a smooth, firm coating which is not brittle and never cracks or peels. It never sours or ferments.

Clark Size costs less than any other sizing material. It is most satisfactory for papering and painting.

Packed in 1-lb. tubes, every one of which is good with us for its full price at any time—that's our guarantee.

SPENCER KELLOGG & SON'S PURE LINSEED OIL

Including the Famous "Kellogg Improved Boiled" Pure Linseed Oil

It is well known that without an absolutely pure linseed oil no painting job can be certain. The makers of "Kellogg Improved Boiled" Pure Linseed Oil are the largest crushers of Flax Seed in the country—Spencer Kellogg & Sons, Inc., of Buffalo, Minneapolis and New York. They own and operate their private tank car line and al-

though an entirely independent concern have offices and refineries all over the country.

"Kellogg Improved Boiled" Pure Linseed Oil is not at all like ordinary boiled oil because it is practically as light and as thin in spread as the raw linseed oil, from which it is made. This means that it will not dim pigments and that it will cover more "house."

The last trace of moisture and impurities is removed from "Kellogg Improved Boiled" Pure Linseed Oil, so it makes the most water-tight and durable paint.

"Kellogg Improved Boiled" Pure Linseed Oil is absolutely ready-to-use. You do not have to thin it or add any drier for either outside or inside work. It is guaranteed by their Gold Bond Guarantee, which says that Spencer Kellogg & Sons, Inc., will pay one hundred dollars in gold for evidence that will lead to the apprehension and arrest of any person or persons guilty of adulterating oil or selling adulterated oil under their brand or trade-mark.

This concern makes over thirty special Linseed Oils, and, of course, raw linseed oil; but "Kellogg Improved Boiled" Pure Linseed Oil is perhaps the most useful to the painter and the one that would give him the most satisfaction. You can guarantee a longer-wearing and glossier job if you use "Kellogg Improved Boiled" Pure Linseed Oil.

PLASTER BOARD

Blue Plaster Board

Used in place of plaster for walls, ceiling and wainscoting. Can be used over boards or fastened to studding, making a neat and durable finish. Can be painted or varnished or wall paper may be pasted over it. Strong and durable and warmer than plaster. For sheathing and insulating this is the best material made. There are other so-called blue plaster boards offered for sale at lower prices, but they at the best are only a cheap imitation. Comes in two weights and grades, No. 4 and No. 6.

No. 6, 36 inches wide, 500 square feet to the roll, per roll	\$4.50
No. 4, 36 inches wide, 500 square feet to the roll, per roll	8.00

SAND PAPER

Improved National Flint Paper

This is a fine line of Flint Sand Paper and comes in sheets 9 by 11 inches. Sizes Nos. 0, No. 1/2, No. 1, No. 1 1/2, No. 2, No. 2 1/2, No. 3, per doz.

STEEL WOOL

The American Steel Wool Mfg. Co.'s Steel Wool is made of the finest threads of solid steel and resembles in bulk the ordinary hair used in stuffing mattresses, etc. It is intended for use in place of sand paper, pumice stone, etc. It cuts more quickly and uniformly than sand paper, does not clog or gum up, and it adapts itself readily to the shape of carvings, moldings, etc.

Put up in 1 lb. packages. We do not break packages.

Put up in barrels of about 175 lbs., price per bbl.....	\$6.00
Half bbls.....	4.00

EMPIRE DRY PASTE

This is probably the best Dry Paste in the market and has given satisfaction wherever used. Directions for mixing:

For paste—Dissolve one pound of powder in four or five pints of hot water. No boiling required. (Cold water may be used, but hot makes a smoother paste and does not require as much powder.) Put water in vessel first; stir powder in gradually. When mixed the paste should be of the consistency of cream or mixed paint. If mealy add more water. Mix quantity required for each day and there will be no waste.

For size—Where the walls have not been papered, or where the old paper has been removed, use one pound of powder to eight pints of water.

PRICE LIST

In bulk, 4 lb. pkgs., per pkg.....	\$.50
50 lb. drums, per lb.....	.10
In barrels containing 200 lbs., per lb.....	.09

SPON-TEM DRY PASTE

This paste is different. It is smooth and free from grain—allows the paper to slide easily—and does not in any way discolor or injure any materials. It sticks forever absolutely tight, without curling or peeling. Will not ferment or sour, and has no disagreeable odor. It does not attract rats, mice or other vermin.

The paste will not become thinner, but thickens on standing—it improves with age.

SPON-TEM has such great strength that you can add great quantities of water, of any temperature—making the cost ridiculously small.

Packed in 2 and 5 lb. cloth bags, every one of which is good with us for its full price at any time—that's our guarantee.

BRIDGEPORT STANDARD (Breinig's)

PENETRATING STAIN AND WAXED FINISH

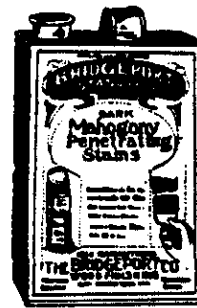

These stains are used to produce on wood the various shades of Mission finishes now so popular. They penetrate the wood deeply, and do not raise its grain. They can be used as one coat finishes, producing in one operation a variety of rich effects with a flat or waxed finish.

Or if desired, they can be filled over, and then finished with varnish, shellac or wax.

Bridgeport Standard (Breinig's) Penetrating Stain and Waxed Finishes are manufactured in six shades: Weathered, Light Weathered, Green Weathered, Flemish, English, Brown Oak and Ry Golden Oak.

	Each
Gallons	\$5.00
½ gallon	2.70
¼ gallon	1.40
⅛ gallon	.80
1/16 gallon	.50

This class of stains is made for coloring various kinds of wood. They are not intended for use as a one coat finish, but invariably should be finished by filling over with the proper shade of Wheeler's Paste Wood Filler, or Bridgeport Standard Liquid Primer, depending on the kind of wood; and then finishing with varnish, shellac or wax, as desired.

It is practical to obtain a waxed finish with R. Y. Golden Oak Penetrating Stain by applying over the stain a thin coat of shellac, and then finishing with Bridgeport Standard Prepared Wax.

Made in a variety of rich shades, principal among which are the following:

R. Y. Golden Oak Penetrating Stain for use on both hard and soft woods for a golden oak finish; for deeper shades, use No. 8 Dark Golden Oak Penetrating Stain.

Dark Mahogany Penetrating Stain, for producing mahogany effects of a rich, red tone.

Brown Mahogany Penetrating Stain, for browner mahogany effects.

We can make to order in this class of stains almost any shade desired.

STOP CRACK

Cracks in Floors

Cracks between the shrunken boards disfigure an otherwise good floor. They are not only unsightly but dangerous to health as well because they catch the dirt and form breeding places for vermin.

Filling the cracks with Stop-Crack makes an old floor look like new and prevents moths from attacking carpets or rugs. It is antiseptic—contains a disinfectant which is sure death to germs.

PRICE LIST

12½ and 25 lb. cans, per lb.....	.24

OLD ENGLISH FLOOR WAX

Is a perfect finish for all hardwood floors. It is composed more largely of hard wax, therefore it will give a more lasting finish. It is transparent.

Instead of obscuring, it emphasizes the beauty in the natural color and grain. It is neither too hard nor soft. It will not flake in cold nor become sticky in warm rooms, and works easily at all times. It will not show scratches or heel marks, as does varnish, shellac, or hard oil. Its viscosity is great, hence it covers

and protects the surface perfectly, and produces the subdued lustre which is always considered the perfection of finish in hardwood floors. It is economical. One pound will cover a room 15 x 20 feet. Parts of floors subjected to unusual wear may be waxed without having to refinish the entire floor as becomes necessary when varnish is used.

Old English Floor Wax is put up in one, two, four and eight pound cans with friction tops, ready for use. An owner of hardwood floors having a can of Old English Floor Wax and one of Brightener, needs no other preparations to obtain and maintain the utmost beauty and service that can be had from his floors.

PRICE LIST

CABOT'S "CREOSOTE" SHINGLE STAINS

Cabot's "Creosote" Shingle Stains contain a large amount of Creosote for their base, also the highest grades of English ground colors, and the proper amount of fixative oil to make the colors durable and lasting.

These Stains give a remarkably artistic coloring effect especially adapted to the shingle work of the modern style of house, whether on roof or sides; an effect that can be got in no other way. It is rich and soft, and very different from the gloss and glare of paint.

The Stains can be applied with a brush, as paint is, after the shingles are laid, or the shingles can be dipped in the Stain. The coloring effect is about the same in either case, but the dipping, of course, preserves the shingles best.

Covering capacity, based on the regulation sawed cedar shingle, 4 x 16, is as follows:

One brush coat, 1 gallon to 150 square feet of surface.

Two brush coats, 1 gallon to 100 square feet of surface.

Dipping, 2 1/2 gallons to 2 3/4 gallons to 1,000 shingles.

Dipping, and applying one brush coat after the shingles are laid, 3 gallons to 1,000 shingles.

But two-thirds the length of the shingle need be dipped. If applied with a brush, two coats should be used.

Creosote is not poisonous, but it is disagreeable to the taste, and therefore, when the roof-water is to be used for drinking, it should be turned away from the cistern until two or three hard rains have washed off the superfluous stain, and the remainder has become perfectly dry and hard.

The great covering capacity of these Stains, together with the fact that they require about one-half the time to apply that paint does, renders

them worthy the attention of any one who wishes a durable, artistic coloring effect at low cost.

Only four shades carried in stock. Will order special colors shipped direct.

AD-EL-ITE PAINT AND VARNISH REMOVER The Original—"Works Like Magic"

Being pioneers in the varnish remover business, and having spent years in the perfection of our product, we are able to offer in AD-EL-ITE the easiest and safest way to take off old finishes. Special ingredients give this remover greater penetrating power than any material sold for the purpose.

It is unexcelled for removing old, hard coats of paint, varnish, shellac, wax, or enamel, and leaves the wood in perfect condition for refinishing.

It is free from carbolic acid, lye or carbon bisulphide, can be used without injury to the hands or clothing, and will not raise the grain of the wood nor harm the finest veneer.

It is unequaled as a time and labor saver, and the practical man will find it a most economical, convenient and necessary product not only in removing old finishes, but in taking off letters from plate glass or cleaning windows disfigured with paint blotches. It restores gummed-up brushes to their original usefulness.

The old method of using a burner is always attended by smoke, bad odor and danger of fire. In some states the underwriters will cancel insurance on buildings where the use of the Torch is permitted.

There is always danger in breaking away putty from expensive glass; a little Remover will soften it and render the work easy. Ad-el-ite is indispensable to painters.

Bath tubs, tile floors, or similar surfaces may be cleaned with the addition of a pint of Remover to a pail of water.

Ad-el-ite is trustworthy. It will tackle the most difficult work and finish it up RIGHT. We can give you the greatest value for your money. Send for liberal working sample, free.

ENAMELS SATINETTE

Most perfect and durable white enamel ever made. Greatest covering capacity. "Never turns yellow."

Satinette's Uses

Satinette is suited for decorative work of every description; Gloss Interior and Flat Interior for interior work and Gloss Exterior for all exterior work.

For house decoration it makes a most artistic, durable and sanitary covering. Numerous leading hotels, both in England and on the continent, are finished with Satinette with all-to-be-desired results. Such names as The Carlton, The Savoy, The Langham, The Ritz, and The Midland hotels are indisputable evidence of Satinette superiority.

Many European palaces and thousands of the best homes are decorated inside and out with Satinette, and in such places as Monte Carlo and the South of France, where elegance is of first consideration, Satinette is so much in evidence everywhere as to suggest almost a monopoly of favor.

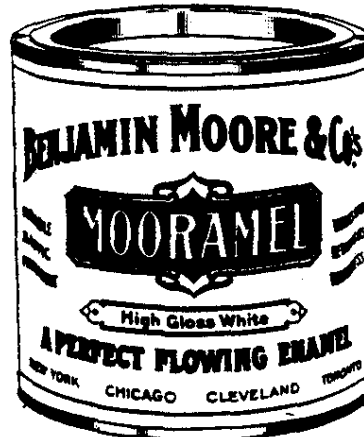

The great railways are large users of Satinette and very many steamship companies have adopted it for painting their ocean-going vessels. By reason of its durability it is first favorite with shipbuilders, striking evidence of which is afforded by the adoption of Satinette against all competitors by the Cunard Company for the decoration throughout of their great liner, the "Mauretania," launched 1907.

Satinette has the distinction of having decorated the town halls, public offices, baths and hospitals of many towns throughout the United Kingdom and the Continent.

MOORAMEL

A Perfect Flowing, Easy Working Enamel With Great Covering Capacity RETAINS ITS WHITENESS

There is no question but that the demand for Enamel Finish is daily increasing and the want of a satisfactory Enamel, which would be at the same time reasonable in price, has long been felt.

After an extended series of experiments carried on by experts who were fully conversant with the requisite qualities of such an Enamel for the practical painter and decorator, we have produced MOORAMEL, which meets the need of a first-class article at a reasonable price, and we venture the assertion that a trial or comparative demonstration will prove to complete satisfaction the superiority of MOORAMEL over any other Enamel on the market either of domestic or of foreign manufacture.

Color.—Mooramel is as white as the whitest and does not discolor or yellow with age.

Working Qualities.—In MOORAMEL we have realized the ideal working and flowing Enamel of the painters' mind. We have long appreciated the weakness of Enamel Paints in that the majority of such products are complained of concerning "quick setting," "pulling," "showing laps and brush marks," and "the inability to wash with soap and water a finished surface without an after effect of fogging and cracking."

All these aforesaid disadvantages are entirely eradicated in MOORAMEL, which works easy, similar to an oil paint, sets slow and flows like a high grade architectural varnish; in fact, MOORAMEL is the easiest working Enamel ever produced.

Drying.—MOORAMEL dries dust-proof in a few hours, dries hard in twenty-four hours and can be rubbed in three or four days when applied under proper atmospheric conditions.

Finish.—MOORAMEL, when perfectly dry, presents a brilliant hard surface similar to the glaze on porcelain; and, while impervious to all ordinary wear and handling, is still elastic enough to prevent cracking or chipping.

Undercoat.—It is useless to expect a good job of Enamel Finish with a poor undercoating. It is very important that the latter be hard and perfectly smooth, upon which the MOORAMEL should be flowed like a varnish and not brushed out like a paint.

Tinting.—MOORAMEL is made only in White, but can be tinted to Ivory, Cream or any shade by thoroughly mixing the requisite amount of oil color to bring the desired tint.

Half pints, each.....	.70

PEERLESS ENAMEL

For all interior painting and decorating where a high gloss is desired. Adapted for use on woodwork, furniture, walls, bath tubs, bedsteads, wagons, automobiles, etc., etc.

To obtain the best results with Peerless Stain and Enamel the surface to be refinished must be thoroughly cleaned from dirt and grease and allowed to dry before refinishing.

Apply several coats on new work allowing sufficient time (at least 24 hours) for the first coat to harden before applying the second.

When Peerless Gloss Stain is used to refinish old work we recommend the use of a color nearest that of the old finish. To change a dark color to one of the lighter transparent colors it will be necessary to first give the work a coat of Ground Color, allowing same to dry hard before refinishing with the color desired.

When applying the Peerless Enamel to new woodwork or on walls use first a coat of Flat White or Ground Color and then one or two coats of the Enamel.

If found too heavy to work easy thin with a little turpentine.

BRILLIANT GOLD ENAMEL

(Washable)

A new and up-to-date gilding medium, combining the best features of the highest class gold paints with the preservative and durable qualities of a real enamel. For decorative gilding of every description, household ornaments and fixtures, fancy baskets and gilt chairs, retouching mouldings and gilding radiators, plaster casts, bric-a-brac and articles of wood, leather, iron, china and glass of every description. To make the material characteristic of the name only the best materials obtainable have been used in its make-up. The gilt powder is what is known commercially as the finest French Leaf Gold Bronze, while the medium used in applying is a high-grade Collodion preparation which acts as a preservative and which enhances the brilliancy and lustre of gold. When applied it forms a gold film on the article decorated which can be washed with soap and water without disastrous results. It is the only gilding medium aside from Genuine Gold Leaf which will stand the test of time. Packed in sliding partition box, including brush.

BRADSHAW'S PATENTED BRONZE PAINTS

Bradshaw's Patent Bronze Paint is unquestionably the most brilliant, durable and economical preparation that has ever been produced. Put up in duplex friction top cans. Powder and liquid being confined in separate chambers within the can enables the operator to mix just enough of the paint to do the work in hand. The proportions of liquid and powder are in perfect harmony, there being just enough in each can. The metal used in these preparations is the highest grade of chemically pure powders.

FINE VARNISHES

Atlantic Varnish Works

FLOORENITE

The Care of Floors

"Floorenite" is a durable, tough, and elastic floor varnish. It will neither scratch, spot nor turn white. Dries free from dust in 18 hours, and hardens in 24. "Floorenite" preserves the floor, gives it a rich, brilliant finish, and flows so easily that anyone can apply it.

A quart of "Floorenite" will keep the average floor in good condition at least one year. Anyone can apply it, and the result when finished will be found artistic, economical and durable.

It has been tested and is used by the United States Government. It is ready for use and easy to apply.

Our Guarantee.—We will ship any responsible person one case containing twelve 1-gallon cans of this varnish with the understanding that they may use two gallons for testing. If not satisfactory in every respect the balance (10 gallons) may be returned at our expense.

DURA-LITE

An ever useful varnish for most all inside work and one that will positively not turn white. "Dura-Lite" flows easily, is very durable and a sample can be had for the asking.

It will stand outdoor exposure.

One of our customers states (name on request): "I have tested 'Dura-Lite' under water for two weeks without the least sign of turning white and without destroying the lustre. I do not hesitate to recommend it to any one."

This company positively guarantees "Dura-Lite" to give satisfaction.

Half gallon cans, each.....	2.70
Quart cans, each.....	1.45
Pint cans, each.....	.80

"NU-GLOS"

"Nu-Glos," as its name implies, is a new product just recently added to our list of interior finishing varnishes. It is a highly lustrous varnish and adapted for all interior work (except floors) where a high durable gloss is desired, at a medium price. It is light in color, full body, works freely over large surfaces, dries dust-free in three to four hours, and is dry through in 18 to 24.

On account of the rich high lustre of "Nu-Glos" we recommend it especially for all interior work, left in the gloss, but our friends tell us that this material also possesses superior rubbing qualities, rubbing more easily than many high-priced varnishes. This feature, as may be seen, largely increases its scope of usefulness, as few finishing varnishes at the price can be rubbed.

"Nu-Glos" may be depended upon to give satisfaction where other varnishes have failed. It carries a sufficient amount of oil to insure the maximum toughness and durability consistent with hard drying.

PRICE LIST

F. O. PIERCE CO.'S
COLOR VARNISHES

"TRIUNE" COLOR VARNISH

Is strictly a varnish product possessing color with the power to cover in one coat. It works as freely as straight varnish and will "flow," "level," "rub," "moss," and exhibit in general the full durable qualities and working properties.

The trade name "TRIUNE" (three in one) aptly suggests the three essential characteristics, first, color; second, power to cover in ONE COAT; third, clear varnish—working properties that serve to distinguish the F. O. Pierce Company's Color Varnish from enamel and glass paints, and from other products made to imitate its unique and valuable combined qualities. Four colors carried in stock—Uzazona, Carmine, Light Brewster Green, and Black.

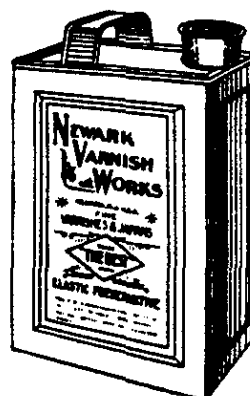

PRICE LIST

Half gallon cans, each.....	\$3.00
Quart cans, each.....	1.60

NEWARK VARNISH WORKS

Our House Specialties

have been used by the leading painters and decorators for many years with the best of results. They are sold at as low a figure as is possible consistent with the price of raw material, and the proper care and ageing before being placed on the market.

ENAMEL WOOD FINISH EXTERIOR
FOR ALL EXPOSED SURFACES

This varnish is designed for use upon all exposed surfaces where the exposure is constant and severe, such as front doors, store fronts, yachts, steamships, piazza posts, etc. It possesses wearing qualities that are not excelled, works very free, and dries dust free in from six to ten hours, depending upon the weather. We invite a comparative test of this varnish with any other make, domestic or foreign.

CLAYTON & LAMBERT GASOLINE TORCHES

NO. 1 TORCH (QUART SIZE)

In making the No. 1 Torch we use a quart size tank, fitting it with our best brass air pump and latest improved flat burner, which hangs on a swivel joint so that the flame may be thrown in any direction. The torch is constructed so that the user holds it in

his left hand, leaving the right hand free to use the knife. The flame being at the side of the tank and free from smoke, the operator is enabled to see the work and follow with the knife, thus doing much quicker and neater work. With other makes the user cannot see so well what he is doing, and as he has to move the torch out of the way before he can get at the work with the knife, he must of necessity heat the surface hotter, which many times results in scorching the woodwork, leaving the surface rough, and it is hard or impossible to use on oil finish. With the No. 1 all these difficulties are removed.

Price, each, Polished Brass, \$8.50.

THE NO. 31 TORCH

Has no equal where intense heat is desired, especially for work in the wind. It is well made and holds one quart. The burner is a powerful generator, producing a strong blast heat, consuming little gasoline.

Remember that we are ever striving to improve our line and that we never offer you experiments. When we say to you, "Your money back if you

are not pleased," it means that we have carefully tested it, and that you run no risk in buying. Do not forget that you buy fuel all the time, and that a saving in this item means much for you. Try one.

Price, each, Polished Brass, \$7.50.

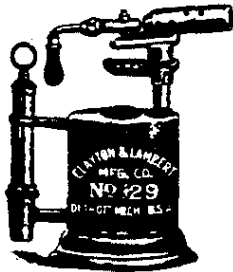

THE NO. 37 TORCH

Is without question the best pint size torch made in this country. The burner is a strong generator which produces a blue needle point flame which is intensely hot and is not affected by wind or zero weather. Please note that this type of burner does not expose the gasoline or vapor to wind or cold, as the orifice through which gas flows is shielded by the burner tube. The No.

37 Torch will save the user its cost in a short time in the saving of gasoline alone. Try it. Your money back if you are not pleased.

Price, each, Polished Brass, \$6.50.

NO. 29 TORCH (QUART SIZE)

This is a popular priced torch, a winner for the money, in which style, quality and construction are not slighted. It possesses every advantage, being unsurpassed in point of utility and service by any other make of torch on the market. The pump, which is in the handle, is fitted with an automatic check valve, and a safety air tube runs from the bottom of the handle to the top of the tank above the gasoline, so that it is impossible for gasoline to get into the pump. Every part of this torch is given close inspection, assembled with great care and thoroughly tested. If you are looking for a good cheap torch, try the No. 29.

Price, each, Polished Brass, \$6.50.

THE NO. 16 TORCH (QUART SIZE)

Is fitted with our latest improved pump which forms a part of the handle. The burner produces a strong blue flame, which is intensely hot and consumes but little gasoline. A careful test of the No. 16 will convince you that it has no equal.

Price each, Polished Brass, \$7.00.

THE PERFECTION MITRE BOX

Has the following points of merit:

The saw-guide can be instantly set and rigidly held by the set-screw at any angle wanted. To facilitate such adjustment with accuracy, notice the projecting gauge points for setting against a "T" or angle bevel.

By means of the sliding key (exactly adjusted between the bearings), the saw-guide can be set to the angles more commonly used, indicated on the dial by the letters M, P, H, O, W, R, W, O, H, P, M, viz.:

R, right angle or square cut; M, mitre or 45 degrees; P, pentagon or 36 degrees; H, hexagon or 30 degrees; O, octagon or 22½ degrees; W, to match usual door and window-sill pitch, 9 degrees.

Any saw may be used—back-saw, panel or hand.

For cutting to exact depths, use a back-saw, the rib resting on the shoulders within the swinging guide; this guide adjusted to the proper height will determine the depth, at the same time that it keeps to the angle to be cut.

A friction-stop, operated by a strong spiral spring below the set-screw, holds the saw-guide from sliding down on the post.

The three screws in the arch of the saw-guide control and adjust the diameter of the opening in which the saw moves, according to the thickness of the saw-blade.

The guide is long, thus insuring accuracy.

May be detached in a minute from the wood box and folded to carry in tool chest. Strongest and most serviceable mitre box device made.

Price, each, \$4.00.

PLASTER HOLDERS

The HESSLER Wall Plaster Holder, a useful and money saving article. The only device that

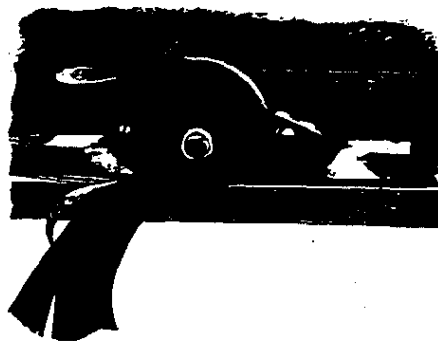

will hold the plaster firmly so that it will not settle or fall off. A few of these unique holders will often save a \$25.00 mason bill and a whole lot of litter and annoyance.

No painter or paper hanger should be without a box in his kit. Every family should have a few dozen in the house. When plaster shows cracks, screw on a few plaster holders and the trouble will be over.

RIDGELY CASING WHEELS

Ridgely Casing Wheels are designed for trimming paper close to window casings, door frames, mantels, wainscoting, etc. Much better and easier to use than a knife. They are an invaluable aid in the production of clean finished work.

The blades are made of the finest quality of steel, carefully tempered and ground. Every blade tested before it leaves the factory and will be replaced if it fails to do the work.

If your dealer cannot supply the number you want we will mail it promptly on receipt of price.

No. 12—1-inch blade.....50c

By mail, add 5 cents each.

No. 14—This cutter is acknowledged by the trade wherever in use to excel all others. The blades are made of finely tempered steel, evenly ground without a bevel, making a clean cut without crushing edges of the paper. Cuts ten thicknesses "Ingrain," four thicknesses "Burlap," also cuts "Lincrusta" with ease. The handle is highly nickel-plated, and fits the hand perfectly, as shown in cut.

Price, each, \$1.20.

RIDGELY SEAM ROLLERS

Some makers have the idea that any old stick with a wheel in it will do for a seam roller, but we believe anything worth doing at all is worth doing well, and we have found that quality in seam rollers is just as much appreciated as it is in any other article.

Only the best of materials are used, and every detail of the construction is carefully watched.

No cracked frames are accepted.

No rollers are used unless the holes are in the center.

No slipshod work in assembling is permitted.

Ridgely rollers will not wobble or fall apart as so many cheap imitations will—they are made right.

No. 1—1-inch oval face cocoabola, rosewood or boxwood roller, 40 cents.

No. 2—1-inch flat face cocoabola, rosewood or boxwood roller, 40 cents.

No. 3—1-inch oval or flat face celluloid over rosewood, 70 cents.

No. 4—1-inch side oval face roller of cocoabola, rosewood or boxwood, 40 cents.

No. 5—Same roller with flat face, 40 cents.

No. 6—Bevel face, 40 cents.

No. 7—With celluloid tire over rosewood, in oval, flat or bevel face, 70 cents.

PLUMBS AND LEVELS

These novel tools are sometimes referred to as a "substitute" for the regulation plumb bob. They are more than that. They are an improvement over it. They will do everything the bob will do, and a lot more besides, and they are much easier to carry and handle.

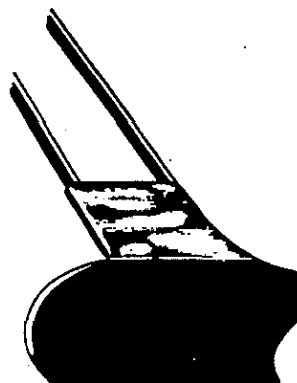

No. 1. Used with any straightedge in manner shown. Bubble in center of crosspiece gives plumb or level in floor or scaffold. Made of machine casting highly nickel plated and guaranteed absolutely accurate. Will pay for itself in one day on plate rail. Weight, 4 ounces. Size, $3\frac{1}{4} \times 3\frac{1}{4}$ inches. Price, \$2.50.

No. 2. A mechanical marvel. Any angle instantly verified by moving pointer to proper figure. Spring marked "2" in cut enables you to attach the tool to any straightedge instantly. No screws to manipulate. When not using straight-edge spring may be removed. This tool is a great help in panel and relief work. By reversing point to 90, you can tell how much the ceiling is out of level. Bubble stands out prominently and can always be seen. Price, \$2.50.

No. 3. Graduating plumb and level to embed in straightedge. Verifies plumb and level, and any angle desired—an advantage in bas-relief work. Various angles obtained by moving inner bushing which holds bubble. Price, \$2.50, with full instructions for using, and how to embed in straightedge.

THE RIDGELY SCRAPO

The king of all scrapers for scraping paint and varnish. Enables you to work on round or grooved surfaces as easily as flat; also indispensable on quarter rounds and mouldings. "It's in the curves." Will pay for itself in scraping three moulded casings. Every painter should have one. Price, 50 cents. By mail, 2 cents extra.

HACKING KNIVES

No. 8—Hand forged blades, leather handles. 4 in. Each.....\$.50

RIDGELY PUTTY KNIVES

A Putty Knife is no great investment, but the best is to be had for the asking, and you may as well have it. Guaranteed Putty Knives, with the Ridgely quality mark on them, cost no more than most of the imitations. Every knife is made of tempered steel and selected woods in our own factory, and if the one you buy isn't the best you ever used, you can return it to your dealer or to us and get your money back.

Any knife not obtainable of your dealer will be sent by mail for 2 cents in addition to price.

No. 27. Blade tempered and polished, maple handle, stained, closed ferrule. Each, 14 cents.

No. 28. Blade tempered and polished, beech handle well riveted. Each, 20 cents.

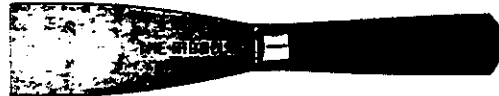

No. 29. Blade tempered and polished, short lap metal bolster, swelled shell cocoabola polished handle. Each, 26 cents.

Length of blades, $3\frac{1}{4}$ inches.

Nos. 27, 28 and 29 stiff or elastic.

All tempered blades of the highest quality steel, and warranted.

No. 31. Tempered and polished blade, closed brass ferrule, solid cocoabola polished handle. Each, 40 cents.

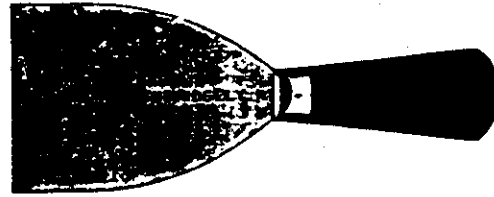

No. 35. Tempered and polished $3\frac{1}{4}$ stiff or elastic blade, cocoabola polished handle. Each, 24 cents.

No. 49

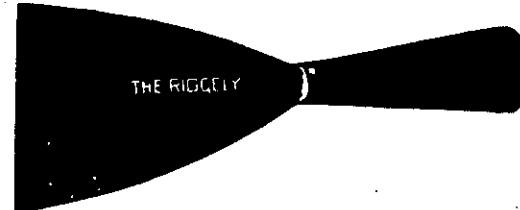

Blade 4 in. by $1\frac{1}{4}$ in., rolled, tempered, polished and cross polished, walnut shell handle with brass rivets. Bolster heavy moulded brass projecting over blade $\frac{3}{4}$ of an inch, thus protecting the blade from breaking or bending at the tang. A beautiful and strong knife.

No. 49—Each\$.60

RIDGELY PAINTERS' SCRAPERS

No. 50. Blade rolled, tempered, polished and cross polished (no bolster), polished cocoabola or circassian walnut handle, brass rivets. Square point only. Stiff or elastic.

No. 50— $2\frac{1}{2}$ in., 50 cents; 3 in., 60 cents; $3\frac{1}{2}$ in., 70 cents; 4 in., 80 cents.

No. 56—Blade rolled, tempered, polished and cross polished, heavy metal bolster, polished cocoabola or circassian walnut handle, brass rivets, stiff or elastic, clip point only—

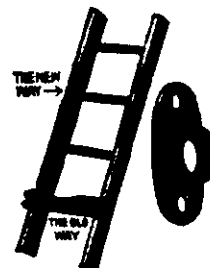

No. 56— $2\frac{1}{2}$ in., 60 cents; 3 in., 70 cents; $3\frac{1}{2}$ in., 80 cents; 4 in., 90 cents.

THE RIDGELY POT HOOK

Note the double hook with reversed prong. Easy to put the bail in and take it out, but it can't come out by accident. The finger loop is also an excellent convenience. Made of japanned steel, nicely finished, and the price is only 10 cents each.

**PAINT AND PASTE MIXER**

No. 470. Saves half the time, no splashing, made of composition metal, weighs 10 ounces and 15 inches long. Each 20 cents.

LADDER RUNG REPLACERS

Made of steel and a broken rung can be repaired as good as new in 5 minutes. Should the

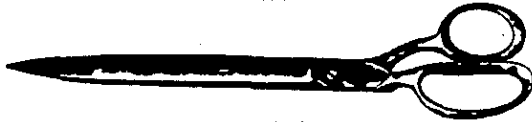

side rail of ladder become broken, take out two rungs, screw on an inch strip, then put the two rungs back by using these replacers, and your ladder will work up and down (if an extension ladder) as good as new.

No. 614—Each\$.20
Size, 3 inches long by 1½ wide. Weight, 1½ pounds to the dozen.

PAPER HANGERS' SHEARS

No. 30

No. 31

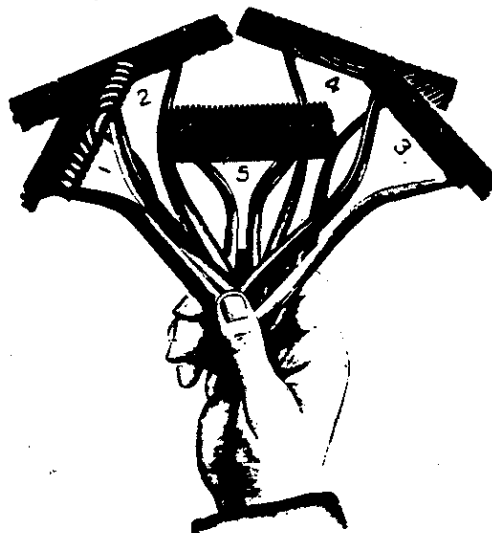

Made expressly for paper hangers' use. Hand forged from finest steel and welded on our composition metal, hardened in water and tempered by natural gas. Every pair guaranteed by us and by the dealer. Either style at the same prices:

No. 5—3 in. long, 1½ in. diam., quartered oak, each.....	1.00

Remember, there are five tools in a set.

The tools are made of a special rubber composition which combines toughness with great elasticity, and the handles are of spring steel. Every set is carefully inspected before it leaves the factory, and with proper care will last indefinitely.

The Ridgely Grainer enables you to work easily and quickly with one hand, anywhere you can reach—and it is the only Grainer that does!

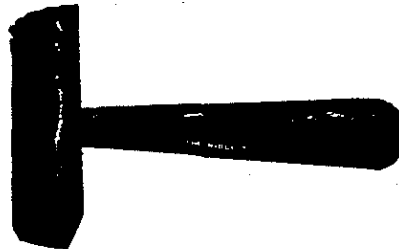

The Ridgely is flexible, and no other Grainer is.

The Ridgely conforms instantly to any unevenness that may be encountered in the surface being grained—and no other Grainer will. Across the top of a door, along an uneven floor, on concave moulding, on pillar or post—wherever you can use a paint brush, there you can imitate the grain of any known growth of wood. Makes grains that look like the real thing, and makes money that is the real thing.

Sold guaranteed to more than please you.

A book of instructions, how to use and how to grain accompanies each set.

Our rights will be rigidly protected on infringers of our patented Grainers. Under the law a purchaser of a patented article is just as liable for damages as the seller.

No. 8. A very popular style, corrugations mounted on ½-round wood blocks, 3 inches wide, will do nice work.

40 cents each.

DAVIS GRAINING ROLLERS

Five inches wide, 1½ inches diameter. These are the genuine Davis Rollers and are made from new and improved moulds.

No. 201. Corrugated Roll for heart grains in any growth of wood, 80 cents.

No. 202. Vein Roll for imitating quarter-sawed oak, 80 cents.

No. 203. Comb Roll for graining plain wood, 80 cents.
The Three in a Set, \$2.00.

Borders and Ceilings in Books 1, 2, and 3 costs the same as Sidewalls

Syracuse, N. Y.

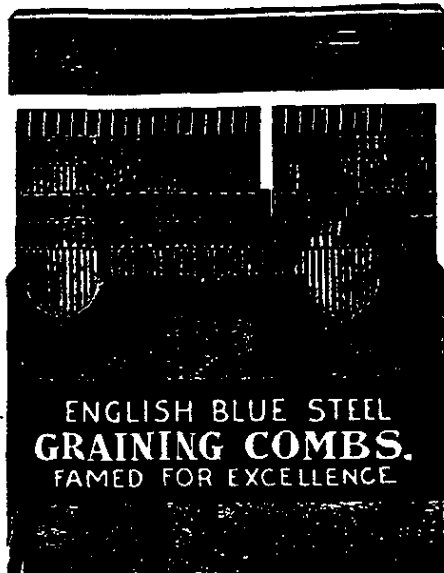

F. W. WURTH
P. L. MILLER Managers.

STEEL GRAINING COMBS

Genuine English Blue Steel Combs.

Set consists of 30 inches packed in tin case made up of separate combs with 6, 9 and 12 teeth per inch, for fine, medium and coarse work.

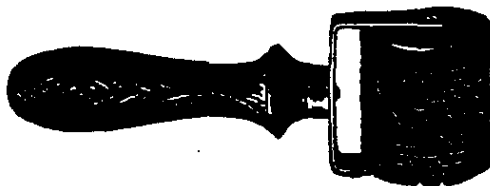

The best grainers all use these combs and consider they cannot do their best work without them.

Price, per set, \$1.70.

Separate Combs, per inch, 5 cents.

Sets by mail, 8 cents extra.

THE RIDGELY CHECK ROLLER

For producing check over grain. Zinc discs; wood axle, 2 inches wide. Designed right and thoroughly well made in every particular.

Price, \$1.00. By mail, 2 cents extra.

No. 71. Combination glass cutter, can opener, knife sharpener, and corkscrew. Each, 10 cents.

THE RIDGELY GRAIN CREATOR

Designed to produce an open-grained effect on close grained wood.

Roll the tool over the wood, then fill the pores with paste filler and varnish. The result is a real grain in the wood that can scarcely be detected from an original growth effect and that will not wear off.

The grain is permanent, and you can do five times as much as by the old methods, at the same time pleasing your customers better.

Tool consists of eight tempered steel discs, with serrated edges, rigidly attached to steel arbor 2 inches wide.

Price, each, \$1.50. By mail 4 cents extra.

BRUSH SUSPENDER

A simple and inexpensive device that has proven indispensable to thousands of busy painters. Made in two sizes, 9 inches and 18 inches long. Keeps your brushes in best condition and enables you to take out any one you want without disturbing the others. You can hardly afford to be without it at the price.

9-inch size, 40 cents; 18-inch size, 60 cents.

By mail, 12 cents extra.

RIDGELY GLASS CUTTERS

Our line of glass cutters is unusually complete, and includes every standard design that has received the approval of the trade, as well as some novelties not shown in other catalogues. Each tool is guaranteed to be exactly as represented and you can return it to us or to your dealer and get your money back if it fails to do the work for which it is designed.

No. 75. For heavy plate glass. Each 20 cents.

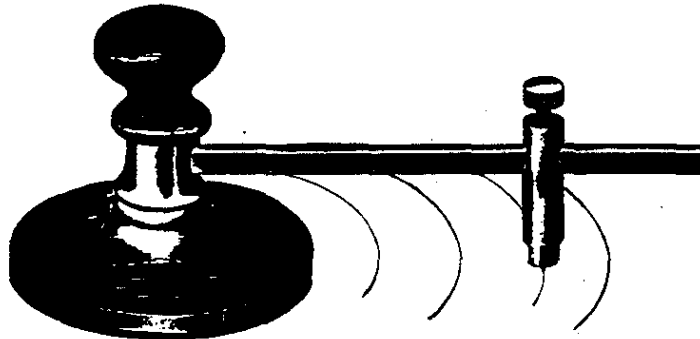

No. 82. This is our favorite and if you want something to tie to, take this. Each 20 cents.

No. 83. Handle light plattern, red finish. Each 20 cents.

CIRCLE GLASS CUTTERS

No. 91. Improved. thumb post does not revolve. It has square graduated guide bar which holds head perfectly rigid; interchangeable head for renewing cutters; bar slides through center posts, reducing length of rod when cutting small circles; has rosewood base, rubber bottom; everything made just right for looks and service. Cuts 20-inch circles.

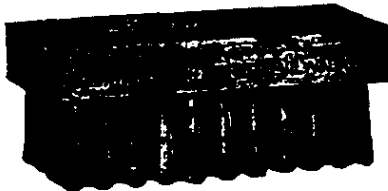

Complete with 12 extra cutter wheels, each..\$2.50
Extra cutter wheels and pins, each..... .10

WIRE BRUSHES

Made of Best Quality Tempered Carbon Steel Wire

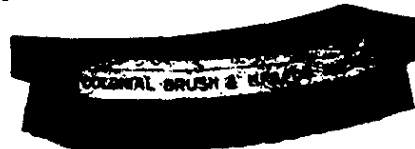

No. 11. Block 7x2½ in., 6x19 rows, wire 1¼ in. long, each 70 cents.

No. 78. Block 7½x2½ in., 5x11 rows, wire 1¼ in. long, each \$1.00.

No. 77. Block 7x3 in., 9x22 rows, wire 1¼ in. long, each \$1.00.

No. 177. Block 8¼x2¼ in., 7x22 rows, wire 1¼ in. long, each \$1.00.

These curved back Brushes are made of very fine round tempered steel wire, and are especially designed for removing paint, varnish, etc., from flat surfaces where a smooth finish is required. They take the place of No. 0 sandpaper. The No. 77 is a full heavy brush, and an excellent tool for cleaning and preparing hardwood floors for finishing. The curved face of these brushes increases their efficiency, as it gives the user a greater leverage than ordinary straight or flat face brushes.

JOHN L. WHITING—J. J. ADAMS CO.

This house and their line is so well and favorably known that very little, if anything, need be said about them or their product.

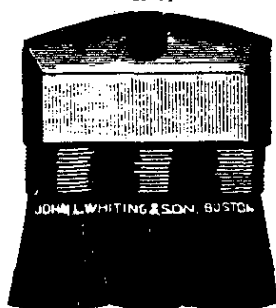

Their brushes give universal satisfaction and are the best in quality, prices and workmanship that we have been able to find in this market. We do not hesitate to recommend them and you will find them satisfactory in every particular and exactly as described.

This house is one of the oldest in the country, and their brushes are manufactured from bristles direct from Russia, Germany, France, China and other countries of origin, and will stand the test of the most rigid inspection and trial.

Notice—The prices on brushes as herein listed are subject to change without notice.

MURES CO

Unequalled as an interior finish for tinting and decorating walls and ceilings of any description

It does not Crack, Peel or Rub off

Pound for pound, Muresco will cover fully 20 per cent. more surface than similar preparations, yet look better and wear longer.

Under ordinary conditions one coat is sufficient, although others can be applied.

Made in White and 16 Tints.

Sold in 5-pound packages, 100-pound kegs, one-half barrels and barrels.

Look for the anchor trade mark on all packages—none genuine without it.

FRESCO COLORS

MADE IN 16 COLORS

Muresco Fresco Colors may be used with Tinting White but each should be dissolved separately and then mixed together before the materials jell, so as to thoroughly incorporate and bring the desired shade.

Ask for decorator's book and color suggestions. Color card on application.

AGENTS, EMPIRE WALL PAPER COMPANY, SYRACUSE, N. Y.

BENJAMIN MOORE & CO.'S

PRODUCES THE IDEAL SOFT VELVET FINISH

Absolutely non-poisonous as it contains no lead.
Especially adapted for walls where a soft flat finish is desired.
Of great body and covering qualities, two coats covering perfectly.

Works easy and sets slowly, showing no laps or brush marks.
Non-changeable, the white positively will not turn yellow with age.

Washable and can be cleaned with water without injury.

A perfect undercoat for enamel.

One gallon covers 500 to 700 square feet.

Sani-Flat is manufactured in White and twenty different shades.

SEND FOR COLOR CARD.

IMPERVO SIZE.

This size is neutral to lime and acid, and impervious to dampness. It contains no rosin, prevents the bleeding of aniline colors, can be used as a substitute for shellac filler on wood-work. One gallon covers 650 square feet.

Why You Should Use Davis' 100 Per Cent Pure Paint

Cost More per Job

You may buy paint that are cheaper
but cost more per gallon than

**DAVIS 100 PER CENT
PURE PAINT**

but you cannot find in the United States a paint that
will cost you less per job.

THIS IS TRUE PAINT ECONOMY.

YOU HAVE NO ONE TO BLAME

but your dealer is persuaded by using any paint
with which the dealer is unable to give you analysis
such as is placed on every package of

**DAVIS 100 PER CENT
PURE PAINT**

ADULTERATIONS

used in High Grade Paint cost usually from twelve to
eighteen dollars per ton. Pure Lead and Pure Zinc
cost from ninety-five to one hundred and twenty
dollars per ton. Which is the better

**DAVIS 100 PER CENT
PURE PAINT**

that carries analysis on every can, or the other kind?
Will you still buy the OTHER KIND?

A FEW REASONS

why you should use

**DAVIS 100 PER CENT
PURE PAINT**

It carries analysis and guarantee.

You receive an honest gallon.

It works freely under the brush.

Its beauty of finish.

It costs less, and takes less.

**NAME US A SINGLE REASON why you should
NOT USE**

This Paint Conforms with all the Pure Paint Laws.

**Our Guarantee on Davis' 100 Per
Cent. Pure Paint.**

Purest Paint Made.

100

PER CENT. PURE

This can of DAVIS' 100 PER CENT
PURE PAINT contains no adulteration in
any form whatever, and when analyzed our
Whites and all Tints will show:

OLD PROCESS LINSHEED OIL

100 Per Cent Pure

OLD PROCESS WHITE LEAD

BASIC CARBONATE

100 Per Cent Pure

SELECTED WHITE ZINC

(oxide)

100 Per Cent Pure.

Including the necessary Pure Tinting Colors
and Turpentine, and Best Oil Dryer.

TO THIS GUARANTEE WE AFFIX OUR SIGNATURE.

The H. B. Davis Company.

DEMAND DAVIS'

AND SEE THAT YOU GET IT.

THINK IT OVER.

There are thousands of paints made in the United
States, many of which are good. More are bad. Most
are indifferent, and of them ALL, only ONE carrying
the Davis analysis and guarantee. Can you do better
than buy

**DAVIS 100 PER CENT
PURE PAINT**

IF YOU DOUBT

the superiority of Pure Paint over the other kind, drop
us a line and we will gladly go into the matter with you.

**DAVIS 100 PER CENT
PURE PAINT**

has been thoroughly tried and tested all over the
country.

IT WILL PAY YOU TO USE IT

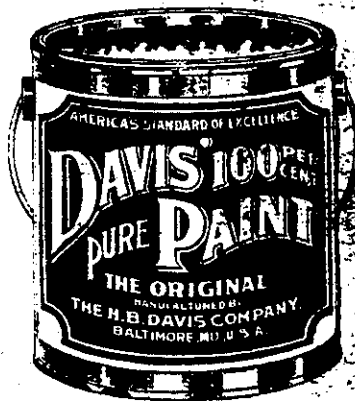

DAVIS 100 PER CENT PURE PAINT

BEAUTIFUL, MOST DURABLE AND BEST

THE PAINT CONFORMS WITH ALL THE PURE PAINT LAWS

THERE IS A
BEST
IN EVERYTHING

IN
PAINT
IT'S
DAVIS'

ANALYSIS
AND
GUARANTEE
ON
EVERY
CAN

The covering capacity of Davis' 100 per cent. Pure Paint is fully from 25 per cent. to 50 per cent. greater than hand-mixed white lead and linseed oil paint or impure prepared paints, and it wears from two to five times longer. It costs as much to apply a gallon of pure paint as it does a gallon of pure paint, and since the greatest cost in painting is labor, you can readily figure the advantage in using Davis' 100 per cent. Pure Paint; besides, things painted with this paint retain their lustre and freshness for years.

When other manufacturers and dealers claim their paint is good and pure, ask why a guarantee label showing contents does not appear on their packages. It is on every package of Davis' 100 per cent. Pure Paint. Remember that materials which include basic carbonate of lead and oxide of zinc, save paint manufacturers from \$90,000,000 per year. Why enrich the manufacturer at your expense?
