Q In 1966 he is talking about asbestos being a marvelous product, isn't he here?

MR. IGNATOWSKI: Objection, Your Honor.

THE COURT: Overruled.

Q Do you want me to read it?

Dr. Selikoff declares that asbestos was a marvelous material, but we have to learn how to use it and live with it.

That is not true today, we shouldn't live with it or use it?

A I think you can. It is still used to some extent today.

Q Doctor, the point I am making is that medicine and science and our knowledge of asbestos and what it can do has changed over time, hasn't it?

A Certainly has, yes.

Q You spoke about a study on direct examination called the Fleischer-Drinker report.

A Yes.

Q Will you tell the ladies and gentlemen of the jury who Fleischer was and who Drinker was?
