The Procter & Gamble Company
P. O. Box 599
Cincinnati, Ohio 45201

Attn: Mr. P. J. Gerwin

Gentlemen:

Mitsubishi Monsanto Chemical Company is a manufacturer of polychlorinated biphenyl, but we are also an overseas subsidiary of Monsanto Company in St Louis, Mo. Hence, Mitsubishi Monsanto Chemical Company is adhering to Monsanto's marketing policy in selling PCB's under close control to users with "closed systems".

The Monsanto Company is keeping us very closely informed as to scientific and commercial practices which are related to the PCB problem. Both industry and government in Japan are also vitally concerned and are fully aware of the persistence of PCB's in the environment.

Very truly yours,

J. R. Durland
