PRECAUTIONARY LABELING FOR ASBESTOS CONTAINING INSULATION PRODUCTS

The question has recently arisen concerning the adequacy of the precautionary label which is attached to Unarcoboard. While reviewing and developing a suggested revised precautionary label it seemed reasonable similar precautionary labeling might be appropriate for our Kaylo products.

It is suggested that this precautionary label be affixed to each carton containing a Kaylo product.

The precautionary label is as follows:

WARNING

This product contains asbestos. Inhalation of asbestos in excessive quantities over long periods of time is harmful. Avoid breathing the dust. If adequate ventilation control is not possible wear respirators approved by the U.S. Bureau of Mines for pneumoconiosis producing dusts.

By copy of this letter I am asking Mr. Robert Logan of the Corporate Legal Staff to review and comment concerning this proposal.

If you have any questions or comments please let me know.
