SUBJECT : Asbestos Disposal

K. A. Lindberg

D. H. Orrell

REFERENCE :

V. P. Osburn

TO : E. G. Fiesenger

This is to report the planned generation of friable asbestos waste, the method of disposal and an estimate of generation amount for the next twelve months (7/85 to 6/86).

It is estimated that operations at this location will generate about 30 cubic yards per month from stripping piping and equipment surfaces during the twelve month period of 7/1/85 to 6/30/86.

Arrangements have been made for the Chocolate Bayou Plant to use an approved Waste Disposal Authority for asbestos disposal.

REF/ELC

To we keep annual records
on the amount we send out? If so
how much did we send out last
year?
