POS COMMUNICATION NO. BS-91-2

DATED: FEBRUARY 19, 1991

FROM: PAUL L. LECOUR
TO: ALL RAYLOG PLANTS
STATUS: PERMANENT UNTIL FURTHER NOTICE
PRODUCT: BRAKE SHOES
SUBJECT: BENDIX NON-ASBESTOS LINING FOR RS-451

Our primary supplier of friction material for brake shoe number RS-451 is Abex. Their segment numbers are EX2042DPF and EX2042DOST. The edge code for the Abex material is NRP11162FF.

Bendix has 125,000 pieces of friction material available for the RS-451 which they are offering to us at an attractive price. We are approving this material as an alternate source. The segment numbers are 2042PR (edge code NRP11030FE) and 2042ATSC (edge code NRP11031DD). This is a combination set, but we will label it as a regular RS-451. This is a premium OEM formula. It is not seconds or rejects from OEM. When using this material, make sure that the label has the letters "BX" in the extreme right hand lower corner of the white part number area. The size of the letters should be 1/4" or smaller. These letters should not look like they are a part of the regular part number.

Please contact Joe Benator for pricing information.
