RE: JOHNS-MANVILLE
HEALTH, SAFETY AND ENVIRONMENT CATALOG

Attached is a copy of the captioned which we thought might be of interest to you.

Johns-Manville is one of our major suppliers and they brought the catalog in simply to show us what has been done in this area.

Just for your information, many of their products originally contained asbestos and they have been working very hard to develop alternate materials that will do approximately the same job. We feel they have been instrumental in helping us eliminate most of the asbestos from our operations.

J. D. CHARLES

JDC: cab

Attachment

P.S. Please return the catalog when you are finished with it.
