With a weather eye on the Monokote petition, on 11 April I issued a short report (copy attached) on the six state legislators from vermiculite plant districts. Subsequently, I sought additional information about their activities and interests.

Attached for your general background reading is material focusing on two of those six men. In particular, Senator Russell (Los Angeles) would appear to be a real pistol on the subject of Cal-OSHA, as is--to a lesser degree--Assemblyman Antonovich (Los Angeles).
