

OFFICE MEMO
SAFETY DEPARTMENT

DATE: MARCH 11, 1977

TO: GORDON P. HURD, Eng. & Standards Assurance
FROM: Carl D. Richardson
SUBJECT: Galbestos roofing and siding material

Per our conversation on March 8, the material Galbestos seems to present no health problems to workers cutting and installing the roofing and siding material.

As far as labeling requirements of OSHA for materials containing asbestos this is not necessary for the asbestos is bonded in the Galbestos siding.

If I can be of further assistance on this matter feel free to call.

Respectfully yours,

Carl D. Richardson
