Subject: ASBESTOS CAUTION LABELLING
BUILDING SYSTEMS DEPARTMENT

J. Zavasky - 48
J. Florian - 54

BS-3E.1.1

As you are aware, J-M has been cited by OSHA for the lack of Asbestos Caution Labels on Thermocore Panels at the Salt Lake City Post Office Job.

We want to re-emphasize that all loads of asbestos-cement products being shipped must contain this label. We have an established procedure which is to be followed, as shown in the attached letter dated July 22, 1974.

Will L. Skarda insure that we are fully covered in all of the Finishing operations in the 390 Shop.

Will B. Andrews insure that shipping is inserting an Asbestos Caution label on all part loads of Standard Transitop shipped from inventory.

It is better to have too many CAUTION labels, rather than none.

The Industrial Engineering and Quality Control Departments will take steps to include the use of the ASBESTOS CAUTION labelling in the applicable Manufacturing Specifications, Incentive Standards and Job Descriptions.

Enclosure: Caution Notices - C. R. Wikel to N. J. Gray, July 22, 1974.

4/28

In Addition - Each panel will be

Stenciled on Joint Board Summary

Top protection with same info

As Label - Effective Date - 4/25/75.
