

Floating Floors[®] elevated flooring systems are designed for safe, sure design.

When you specify Floating Floors elevated flooring systems for computer rooms or other areas, you take no chances.

These aluminum panels won't rust or corrode, will never create computer-damaging ferrous oxide contamination. And since they never need painting, there's no threat from paint flakes either.

Aluminum is non-magnetic. It won't cause static, and actually bleeds off any static that occurs.

Aluminum also offers a unique combination of strength and light weight. A Floating Floors panel system adds less dead load to a building than any other system you can use. Yet each panel can support 1,000 lbs. per square inch. And all the panels are interchangeable — edge-machined for perfect squareness.

Insure your design with Floating Floors. Call your nearby distributor for information. Or write National Lead Company, Floating Floors, Inc., Room 4612, 111 Broadway, New York, N. Y. 10006.
