Dear Frank:

Your letter of December 8, 1960 was forwarded to me at my home address. Early this year I retired from the University of California and am now associated with my brother in private engineering consultation, in charge of the West Coast office.

Regarding the A.P.H.A. Bulletin on "Occupational Lead Exposure and Lead Poisoning", my first thought is that it should be brought up to date and republished, but I would first want to discuss the matter with a few of my colleagues in this area. I shall be away until after Christmas, but as soon as I return I will do this and let you know the outcome. If these people feel that a revision is advisable, we will suggest names of persons to you so they may be appointed officially to function as a committee.

I believe I can find a copy of the report at the Bureau of Occupational Health, but if not, I will let you know so that you can send one to me.

Best regards.

Sincerely yours,

Fred (signed)
