BILLING CODE 6717-01-M

[Docket Nos. RP88-67-000, RP88-81-000, RP88-221-000, RP90-119-001, RP91-4-000 and RP91-119-000 (Phase I/Rates)]

Texas Eastern Transmission Corp.; Informal Settlement Conference

August 29, 1991.

Take notice that an informal settlement conference will be convened in this proceeding on September 4, 1991, at 9 a.m., at the office of the Federal Energy Regulatory Commission, 810 First Street, NE., Washington, DC, for the purpose of discussing issues related to transition costs, comparability of service, rate design and cost allocation.

Any party, as defined by 18 CFR 385.102(c), or any participant as defined in 18 CFR 385.102(b), is invited to attend. Persons wishing to become a party must move to intervene and receive intervenor status pursuant to the Commission's regulations (18 CFR 385.214).

For additional information, contact Dennis H. Melvin at (202) 208-0042 or Arnold H. Meltz at (202) 208-0737.

BILLING CODE 6717-01-M

[Docket No. TM92-1-68-000]

Trailblazer Pipeline Co.; Proposed Change in FERC Gas Tariff

August 29, 1991.

Take notice that on August 28, 1991, Trailblazer Pipeline Company (Trailblazer) tendered for filing Twelfth Revised Sheet No. 4 (Original Volume No. 1) and First Revised Sheet No. 5 (First Revised Volume No. 1A) to be a part of its FERC Gas Tariff, to be effective October 1, 1991.

Trailblazer states that the purpose of the filing is to implement the Annual Charges Adjustment (ACA) charge necessary for Trailblazer to recover from its customers annual charges assessed it by the Commission pursuant to part 382 of the Commission's Regulations. The rate authorized by the Commission to be effective October 1, 1991 is .24¢ per Mcf.

Trailblazer requested waiver of the Commission's Regulations to the extent necessary to permit the tariff sheets to become effective October 1, 1991.

Trailblazer states that a copy of the filing is being mailed to Trailblazer's jurisdictional customers and interested state regulatory agencies.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with §§ 385.214 and 385.211 of the Commission's Rules and Regulations. All such motions or protests must be filed on or before September 6, 1991. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

Linwood A. Watson, Jr.,

Acting Secretary.

[FR Doc. 91-21207 Filed 9-4-91; 8:45 am]

BILLING CODE 6717-01-M

[Docket Nos. RP84-94-010]

Trailblazer Pipeline Co.; Report of Refunds

August 29, 1991.

Take notice that Trailblazer Pipeline Company (Trailblazer) on August 23, 1991, tendered for filing with the Federal Energy Regulatory Commission (Commission) its Report of Distribution of Refunds paid to gas sales customers on December 15, 1989, May 11, 1990, and July 25, 1991. Trailblazer states that the report is being made pursuant to the Commission's order issued on April 9, 1991, approving the Stipulation and Agreement filed October 23, 1990 in Docket Nos. RP84-94-010.

Trailblazer states that a copy of the report has been mailed to each of Trailblazer's customers, intervenors and other interested parties.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rule 211 of the Commission's Rules of Practice and Procedure 18 CFR 385.211. All such protests should be filed on or before September 6, 1991. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the

Commission and are available for public inspection.

Linwood A. Watson, Jr.,
Acting Secretary.

BILLING CODE 6717-01-M

[Docket No. ER91-195-002]

Western Systems Power Pool; Notice of Filing

August 23, 1991.

Take notice that on August 19, 1991, Western Systems Power Pool tendered for filing its compliance report in this docket in compliance with the Commission's orders issued on April 23, 1991 and June 27, 1991.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 18 CFR 385.214). All such motions or protests should be filed on or before September 6, 1991. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

ENVIRONMENTAL PROTECTION AGENCY

[OPTS-81021; FRL-3940-9]

TSCA Inventory; Notice of Intent To Remove 72 Reported Chemical Substances

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In reviewing the chemical substances included on the Toxic Substances Control Act Chemical Substance Inventory, EPA has concluded that certain chemical substances were incorrectly reported and listed. EPA intends to remove 72 chemical substances from the Inventory and solicits public comment on the appropriateness of that removal.

VVV 000007928

DATES: Comments must be received by EPA on or before October 21, 1991.

ADDRESSES: Three copies of the written comments should be addressed to: TSCA Document Processing Center (TS-790), Environmental Protection Agency, Office of Toxic Substances, 401 M St. SW., Washington, DC 20460.

Comments should bear the identifying notation OPTS-81021. The administrative record supporting this action is available for public inspection in the OPTS Reading Room, NE Mall G004, at the above address, from 8 a.m. to noon and 1 p.m. to 4 p.m., Monday through Friday, excluding holidays.

FOR FURTHER INFORMATION CONTACT: David Kling, Acting Director, Environmental Assistance Division (TS-799), Office of Toxic Substances, U.S. Environmental Protection Agency, rm. E-545, 401 M St. SW., Washington, DC 20460, (202) 554-1404, TDD: (202) 554-0551.

SUPPLEMENTARY INFORMATION: Section 8(b) of the Toxic Substances Control Act (TSCA), Pub. L. 94-469, requires the Administrator of the EPA to identify, compile, and keep current a list of chemical substances which are manufactured, imported, or processed for commercial purposes in the United States. To meet this requirement, EPA promulgated the Inventory Reporting Regulations (40 CFR part 710), which appeared in the Federal Register of December 23, 1977 (42 FR 64572). These regulations provided the basis for the initial compilation of the TSCA Chemical Substance Inventory, which identifies chemical substances in U.S. commerce.

The Inventory is a compilation of chemical substances that have been manufactured, imported, or processed in the United States for commercial purposes since January 1, 1975. The Inventory's primary purpose is regulatory. It defines a new chemical substance for purposes of implementing section 5(a)(1)(A) of TSCA. If a chemical substance is not included in the Inventory, it is considered a new substance (section 3(9) of TSCA), and a premanufacture notice (PMN) is required at least 90 days before the manufacture or import of such a substance can begin.

For the Inventory to perform its regulatory functions, it must be continuously and accurately updated as new information becomes available. Updated information includes identities of new chemical substances which are being introduced into U.S. commerce and corrections for previously reported information. Recognizing industry's need for making corrections to incorrectly

submitted Inventory reports, EPA announced, in the Federal Register of July 29, 1980 (45 FR 50544), that it would accept certain types of corrections related to substances previously reported for the Inventory. The types of corrections specified in the July 29, 1980 Federal Register notice relate to chemical identity.

Since the publication of the Inventory and the July 29, 1980 Federal Register notice, the Agency has received numerous requests to correct certain previously submitted Inventory reports. The Agency reviewed these correction requests and the corresponding reports originally submitted for the Inventory, and concluded that a number of the chemical substances currently listed on the Inventory were erroneously reported. Furthermore, in reviewing the total body of the Inventory submissions, the Agency discovered that each of the incorrectly listed substances was reported only by a submitter who subsequently requested that EPA correct the chemical identity originally reported, or who subsequently notified the Agency that the substance in question was solely manufactured for a non-TSCA use.

There are various reasons why chemical substances were incorrectly reported for the Inventory. First, the mistakes could have been typographical or transcriptional and were not known to the submitter when the original report was submitted. Second, improved analytical equipment and methods may have allowed for a more accurate description of a previously reported substance. Third, EPA may have identified reporting errors and requested corrections. Regardless of the source of error, the result is the same: A chemical substance not eligible for inclusion on the Inventory was reported and currently is included on the Inventory. If these mistakes are not corrected, the integrity of the Inventory will be impaired, and its reliability as an accurate compilation of commercial substances for TSCA purposes will diminish. In addition, substances which should be subject to premanufacture notification (PMN) review before they are manufactured or imported would not be reviewed.

In this notice, the Agency proposes to remove 72 chemical substances. The Agency has found that these chemical substances were incorrectly reported and listed. The substances proposed for removal from the TSCA Inventory are listed by Chemical Abstracts Service (CAS) Registry Number. Each of the 72 chemical substances is further identified by its corresponding Chemical Abstracts Preferred Name.

Each of the 72 chemical substances proposed for removal was reported for the Inventory. Subsequently, persons who had reported the chemical substances in question informed EPA of errors in their submissions. In the majority of the cases the errors were due to mistaken chemical identities. The corrected identities for these chemical substances have been added to the Agency's Master Inventory File. EPA has checked each of these 72 chemical substances, as originally reported, to determine whether any other person had also reported the same chemical substance for the Inventory. No others were found.

In accordance with EPA policy (OTS Order 7730.7), an erroneously or incorrectly reported chemical substance should be removed from the Inventory. Accordingly, these 72 chemical substances do not appear to be eligible for continued inclusion on the Inventory.

Publication of this notice does not mean that EPA will actually and automatically delete from the Inventory any of the 72 chemical substances listed below. Rather, the Agency solicits public comments on its intent to remove from the TSCA Inventory the listed substances. EPA is specifically interested in knowing whether any of the chemical substances listed below have been manufactured, imported, or processed for TSCA commercial purposes other than research and development, as defined in the Inventory Reporting Regulations (40 CFR 710.2 (p)), by anyone during the period January 1, 1975 through September 5, 1991. The Agency is also interested to know whether any person can show that any of the chemical substances could have been properly reported for the Inventory. EPA also solicits comments from anyone who believes that any of the chemical substances listed below should not be removed from the TSCA Inventory for any reason. With the publication of this notice, any on-going manufacture, import, or processing of any of the 72 chemical substances listed below which was begun prior to the publication date of this notice may continue until publication of the final notice of disposition. All such comments must be submitted to EPA within the 45-day comment period.

EPA will review all comments received and will make a determination regarding the eventual status of each of the chemical substances listed below. The Agency will announce its decision in a final notice of disposition in the Federal Register. EPA will not consider any request to retain any of the listed chemical substances on the Inventory

based solely on manufacture, import, or processing of that substance which begins after September 5, 1991. If the Agency determines that any of the listed chemical substances should not be removed from the Inventory,

manufacturers, importers, or processors of these chemical substances would be invited to submit Inventory Reports to establish the need to retain the chemical substances on the Inventory. The substance would then remain on the Inventory. On the other hand, if the Agency concludes that a chemical substance is not eligible for inclusion on the Inventory, effective with the publication of the final notice of disposition, the chemical substance will be considered removed from the Inventory—the presence of its name in any previously published version of the Inventory notwithstanding. In that event, the premanufacture requirements

of section 5(a) of TSCA would apply to any manufacture or import of the chemical substance from the date of removal.

The following is a list of incorrectly reported chemical substances proposed for removal from the TSCA Inventory. In response to industry requests, the EPA is also providing the CAS Registry Numbers (CASRN's) for the chemical substances which replace the 72 chemicals proposed for delisting from the Inventory.

Chemical Substances Proposed for Removal from TSCA Inventory

NOTE: The first column, as stated above, is a listing of the CASRN's for the chemical substances which replace the 72 incorrectly reported substances. The substances corresponding to these replacement CASRN's have already been added to the TSCA Inventory. For

purposes of this notice, the specific names of the corrected chemical identities have not been included. The second column contains CASRN's (in ascending order) of the 72 incorrectly reported chemicals as they were originally reported for the Inventory. The third column is lists, by chemical name, of each of the 72 incorrectly reported substances corresponding to the CASRN's in the second column. The second and third columns represent substances that are proposed to be delisted from the TSCA Inventory, while the first column represents the corrected substances already placed on the Inventory, which have altogether different chemical identities from the incorrectly reported substances.

Accordingly, EPA proposes the delisting of the 72 chemical substances listed above from the TSCA Inventory.

CASRN's of Replacement Chemicals	CASRN's of Incorrectly Reported Substances	Incorrectly Reported Substances Proposed for Delisting from the Inventory
16659-50-0	128-49-4	Butanedioic acid, sulfo-, 1,4-bis(2-ethylhexyl) ester, calcium salt
16889-19-3	496-03-7	Hexanal, 2-ethyl-3-hydroxy-
33166-68-6	922-32-7	Glycine, N-[imino(phosphonoamino) methyl]-N-methyl-, disodium salt
50696-68-8	3343-24-6	Benzeneundecanoic acid
29870-28-8	5988-51-2	Ethanol, 2-(dimethylamino)-, [R-(R*)]-2,3-dihydroxybutanedioate (1:1) (salt)
42360-29-2	6222-63-5	2-Naphthalenesulfonic acid, 7-(acetylamino)-3-[1-(4-(acetylamino)phenyl)azo]-4-hydroxy-, monosodium salt
68784-14-5	12002-22-1	alpha-D-Glucopyranoside, beta-D-fructofuranosyl, mono-2-propenyl ether
