Date: September 14, 1966

Department 22

VCM production was 91% of rated capacity. One rundown (190,000 lbs.) of product showed off-spec at 1.8 ppm HCl. 150,000 lbs. will be loaded directly to a tank car and shipped to Carbide. The remainder will be rerun.

Muriatic Acid Production: 0 gallons.

Department 23

EDC production was 86% of rated capacity. Rates were limited by Cl₂ availability due to operating with 23T1-3 (Cl₂ feed tank) out of service.

Department 26

O. C. production was 117% of rated capacity. Operations were normal.
