

Project No. 421167

April 1987

Draft Report

Endangerment Assessment

Brio Refining Inc. Site and Dixie Oil Processors Site

Friendswood, Texas

prepared for

Brio Task Force

RSV 0021510

ENDANGERMENT ASSESSMENT TABLE OF CONTENTS

SECTION		
1.0	INTRODUCTION	1-1
1.1	SITE DESCRIPTION AND HISTORY	1-4
1.1.1	Brio Refining Site	1-4
1.1.2	Dixie Oil Processors Site	1-5
1.1.3	History of Site Operations	1-5
1.1.3.1	Operations at the Brio Refining Site	1-5
1.1.3.2	Operations at the Dixie Oil Processors Site	1-8
1.1.4	Additional Historical Background	1-9
1.2	SITE CHARACTERIZATION	1-10
1.2.1	Scope of the Chemical Analytical Data Base	1-11
1.2.1.1	Data Generated by the Remedial Investigation (RI)	1-11
1.2.1.2	Data Generated by the Supplemental Remedial Investigation (SRI)	1-11
1.2.1.3	Endangerment Assessment Database	1-13
1.2.2	Summary of Chemical Analytical Data	1-13
1.2.2.1	RI Data	1-13
1.2.2.2	SRI Data	1-15
1.2.3	Statistical Rationale for SRI Tables	1-15
1.2.4	Quality and Validity of the Chemical Data	1-15
1.2.5	Extent of Contamination	1-16
1.2.5.1	Extent of Contamination - Ambient Air	1-16
1.2.5.2	Surface Soils - Extent of Contamination	1-16
1.2.5.3	Shallow Trench (Depth 2.5 feet) Near Pit Q	1-18
2.0	ENVIRONMENTAL FATE AND TRANSPORT	2-1
2.1	ENVIRONMENTAL TRANSPORT PARAMETERS	2-1
2.1.1	Physical and Chemical (of the Waste) Parameters	2-1
2.1.2	Hydrogeological Factors Influencing Transport	2-2
2.1.2.1	Concentration Levels	2-3
2.1.2.2	Geologic Features	2-4
2.2	SITE PHYSIOGRAPHY/TOPOGRAPHY	2-6
2.3	MIGRATION CHARACTERISTICS OF THE PRINCIPAL CONTAMINANTS	2-7
3.0	EXPOSURE ASSESSMENT	3-1
3.1	RECEPTOR DEFINITION	3-1
3.1.1	Land Use	3-1
3.1.2	Demography	3-2
3.1.3	Socioeconomic Characteristics	3-3
3.1.4	Special Receptor Characteristics	3-4
3.1.5	Well Inventory	3-5
3.1.2	Ecology	3-7
3.2	EXPOSURE PATHWAYS	3-8
3.2.1	Ground Water Discharge to Mud Gully Impacting Aquatic Communities and Recreational Water Use	3-10
3.2.2	Site Contamination Entering a Drinking Water Supply	3-10
3.2.3	Flow From the NSCZ to the 50-Foot Sand	3-11
3.2.4	Sediment Migration Off-Site to Mud Gully	3-12
3.2.5	Contaminated Runoff to Mud Gully	3-13
3.2.6	Release of Airborne Particulates and Volatile Emissions	3-13
3.2.7	Contaminated Soil Ingestion Route of Exposure	3-14
3.2.8	Reversal of Gradient Between NSCZ and the 50 Foot Sand	3-14

TABLE OF CONTENTS
(Continued)

<u>SECTION</u>	<u>PAGE</u>
3.2.9 Fault and or Faulty Well Casing	3-15
3.2.9.1 Fault Number 70	3-15
3.2.9.2 Onsite Water Wells	3-16
3.3 EXPOSURE LEVELS AT THE RECEPTOR LOCATION	3-16
3.3.1 Ambient Air Exposure Pathway	3-16
3.3.1.1 Introduction	3-16
3.3.1.2 Estimation of the Receptor Ambient Air Concentrations (Exposure Level)	3-17
3.3.1.3 Duration and Frequency of Exposure	3-18
3.3.1.4 Effective Dose	3-19
3.3.1.5 Regression Analysis and Conversion Equation	3-19
3.3.2 Ground Water Pathway	3-19
3.3.2.1 Indicator Chemicals and Concentrations	3-20
3.3.2.2 Selection of NSCZ Monitoring Wells	3-20
3.3.2.3 Discharge to NSCZ to Mud Gully	3-21
3.3.2.4 Stream Flow in Mud Gully	3-22
3.3.2.5 Dilution in Mud Gully	3-24
3.3.2.6 Dilution Scenarios	3-24
3.3.2.7 Concentrations in Mixing Zone	3-25
3.3.2.8 Comparison of Exposure Point Concentrations to Ambient Water Quality Criteria or Aquatic Toxicity Values	3-25
4.0 HAZARD IDENTIFICATION	4-1
4.1 SELECTION OF THE INDICATOR CHEMICALS	4-2
4.1.1 Initial Procedure to Summarize Waste and Environmental Data	4-3
4.1.2 Identification of "High Risk" Chemicals	4-5
4.1.3 Physical, Chemical and Environmental Fate Data	4-5
4.1.4 Ranking of Constituents	4-5
4.1.5 Indicator Chemicals RI Data	4-6
4.2 FINAL INDICATOR CHEMICAL SELECTION	4-8
4.3 TOXICITY OF THE INDICATOR CHEMICALS - CARCINOGENICITY	4-11
4.3.1 Carcinogenicity Evaluation	4-11
4.3.2 Weight of Evidence for Carcinogenicity	4-12
4.4 SUBCHRONIC AND CHRONIC TOXICITY	4-13
4.5 ACUTE TOXICITY	4-14
4.6 DEVELOPMENTAL TOXICITY	4-15
4.7 DOSE-RESPONSE RELATIONSHIPS	4-15
4.8 EPIDEMIOLOGICAL EVIDENCE	4-16
5.0 RISK CHARACTERIZATION (RISK AND IMPACT EVALUATION)	5-1
5.1 VOLATILE EMISSIONS TO AMBIENT AIR AND OFF-SITE IMPACTS	5-1
5.1.1 Carcinogenic Potency	5-2
5.1.2 Cancer Risk Calculations	5-2
5.2 DERMAL CONTACT AND INGESTION OF SURFACE SOILS	5-4
5.2.1 Ingestion of Surface Soils	5-4
5.2.2 Soil Concentration (Source of Exposure)	5-7
5.2.3 Toxicological Data - Animal Studies Used	5-7

TABLE OF CONTENTS
(Continued)

<u>SECTION</u>	<u>PAGE</u>
5.2.4 Calculations of Chronic Daily Intake for Dermal Absorption and Oral Ingestion of Contaminants in On-Site Soil	5-9
6.0 CONCLUSIONS	6-1
7.0 INTER RISK COMPARISONS	7-1
8.0 RISK MANAGEMENT TECHNICAL APPROACH FOR DEVELOPMENT OF REMEDIAL LEVELS AND GOALS FOR THE FEASIBILITY STUDY ALTERNATIVES	8-1
8.1 REMEDIAL OBJECTIVES FOR PIT WASTES, SUBSOILS, AND IMPOUNDMENT SLUDGES	8-4
8.1.1 Technical Approach 1	8-5
8.1.2 Technical Approach 2	8-6
8.2 REMEDIAL OBJECTIVES FOR THE NSCZ	8-7
8.2.1 Alternative 1	8-7
8.2.2 Alternative 2	8-8
8.3 REMEDIAL OBJECTIVES FOR MUD GULLY (SURFACE WATER)	8-8
8.3.1 Alternative 1	8-8
8.3.2 Alternative 2	8-8
8.4 REMEDIAL OBJECTIVES FOR MUD GULLY (SEDIMENTS)	8-9
8.5 REMEDIAL OBJECTIVES FOR AIR PATHWAY	8-9
8.6 REMEDIAL OBJECTIVES FOR PIT WASTES, CONTAMINATED SOILS, SUBSOILS AND IMPOUNDMENT SLUDGES FOR NON-CARCINOGENIC PARAMETERS	8-10
8.6.1 Residential Soil Ingestion Scenario	8-11
8.6.2 Infrequent Trespass Soil Ingestion Scenario	8-12
8.6.3 Carcinogenic PNAs	8-12
8.7 FEASIBILITY STUDY OBJECTIVES	8-13
9.0 EVALUATION OF PUBLIC HEALTH ASPECTS OF FEASIBILITY STUDY ALTERNATIVES	9-1

APPENDICES	

LIST OF APPENDICES

Appendix A	Supplemental Remedial Investigation Summary Statistics
Appendix B	Carcinogenic Risk Calculations for Ambient Air Pathway
Appendix C	Soil Ingestion and Skin Absorption Scenarios Non Carcinogenic Risk Calculations

LIST OF TABLES

Table 1-1	List of Reported Residuals in the Brio Pits
Table 1-2	Scope of the Remedial Investigation Chemical Analytical Program - Brio Site
Table 1-3	Scope of the Remedial Investigation Chemical Analytical Program - Dixie Oil Processors Site
Table 1-4	Scope of the Supplemental Remedial Investigation Chemical Analytical Program - Brio Site
Table 1-5	Scope of the Supplemental Remedial Investigation Chemical Analytical Program - Dixie Oil Processors Site
Table 1-6	Chemical Analytical Data Used in the Endangerment Assessment - Brio Site
Table 1-7	Chemical Analytical Data Used in the Endangerment Assessment - Dixie Oil Processors
Table 1-8A	Waste Pit Analytical Results
Table 1-8B	Waste Pit Subsoils Chemical Analytical Results
Table 1-8C	Monitoring Well Data Collected During Remedial Investigation - Brio Site
Table 1-8D	Monitoring Well Data - Non Aqueous Phase Liquid Collected During Remedial Investigation
Table 1-8E	Prevalence and Statistical Analysis of Chemical Analytical Results for the NSCZ
Table 1-8F	Monitoring Well Data Collected During the Remedial Investigation - DOP Site
Table 1-9A	Chemical Analytical Results NSCZ Ground Water (Supplemental Remedial Investigation)
Table 1-9B	Summary of SRI Analytical Results for Surface Water Samples
Table 1-9C	Summary of SRI Analytical Results for Pit Q Drainway and Mud Gully Sediments/Soil

LIST OF TABLES
(Continued)

Table 2-1	Physical, Chemical and Environmental Fate Properties of Brio/DOP Contaminants
Table 3-1	Census Tract Population within a Four-Mile Radius
Table 3-2	Census Tract Population within a One-Mile Radius
Table 3-3	Census Tract Population within 1,000 Feet
Table 3-4	Water Well Inventory - One Mile Radius
Table 3-5	Toxicity Data for Aquatic Biota
Table 3-6	Indicator Chemicals and Concentrations
Table 3-7	Predicted Mud Gully Concentrations after Dilution of NSCZ Constituents from 13A and 18A versus Aquatic Toxicity Levels for Fresh Water Fish
Table 3-8	Predicted Mud Gully Concentrations after Dilution of NSCZ and Pits B, D, and E Contributions versus Aquatic Toxicity Levels for Fresh Water Fish
Table 4-1A	Physical/Chemical/Toxicological Ranking of Potential Indicator Chemicals in Heavily Contaminated Pits B, J and Q
Table 4-1B	Physical/Chemical/Toxicological Ranking of Potential Indicator Chemicals in Waste Pit Residuals (data for moderately and lightly contaminated pits)
Table 4-1C	Physical/Chemical/Toxicological Ranking of Potential Indicator Chemicals in Ground Water - NSCZ
Table 4-1D	Toxicological Ranking (Details) of Potential Indicator Chemicals
Table 4-1E	Physical/Chemical/Toxicological Ranking of Potential Indicator - Runoff to Mud Gully and Mud Gully Sediment
Table 4-1F	Physical/Chemical/Toxicological Ranking of Potential Indicator Chemicals-Subsoil and Wastewater Treatment System Sludges
Table 4-2	Toxicological Parameters for Constituents at Brio/DOP
Table 4-3	EPA Weight of Evidence Categories for Potential Carcinogens

LIST OF TABLES
