Attention: Mr. L. O. Lohmeyer
Owner

Gentlemen:

An inspection of your plant was conducted on June 20, 1966 by Walter Chrostek, industrial hygienist. During this inspection, it was learned that asbestos-containing materials are processed by your plant. Because of the hazardous nature of this substance, the following recommendation is made.

Institute a program of preplacement and periodic chest X-rays for all personnel exposed to asbestos dust.

A copy of our Hygienic Information Guide entitled "Asbestos", our booklet entitled "Dust" and Article 432, as revised, are enclosed.

Very truly yours,

Leon T. Gonshor
Regional Industrial Hygienist
