

1 around one, well, then, that substance doesn't cause  
2 disease.

3 Well, let's see what he found.

4 First study, study done by McGill University  
5 in Canada in 1980. Relative risk .92, less than one,  
6 doesn't cause the disease.

7 U.S. National Cancer Institute, study done  
8 in 1985 and 1994, by the way, the U.S. National Cancer  
9 Institute, as we learned, is actually an arm of the  
10 Federal Government.

11 Anyway, 1.0, the exact same relative risk  
12 for the population who is not occupationally exposed  
13 to asbestos. Doesn't cause the disease.

14 Connecticut State Health Department, 1983  
15 relative risk .65, doesn't cause the disease, less  
16 than one.

17 University of Geison, Germany, and this is  
18 the study that came out just a couple of years ago,  
19 1994, 0.87, less than one, doesn't cause the disease.

20 Those are the studies, and those are what  
21 they show. And what they show is that brake and
