

1 group of tumors that occur in the lung that are

3 deal of controversy about them now, especially with
4 respect to how they are treated.

5 Q Have you given lectures concerning the
6 disease mesothelioma?

7 A Many times.

8 Q Have they been both nationally and
9 internationally?

10 A Yes. I am going to be giving two lectures
11 on mesotheliomas in Budapest in October of this year.

12 Q Doctor, this book, is this a book that is
13 used by medical students?

14 A Not very commonly. Medical students will
15 sometimes refer to that book if they want to know a
16 great deal of information on a specialized type of
17 lung disease.

18 That book is primarily used by other
19 pathologists, just general pathologists who would want
20 to know more information about a certain type of lung
21 disease.
