Dear Bob:

I took the attached letter which was received in the New York office with me last week with the intention of giving it to you for your files.

Since we went separate ways after our luncheon with the Esso Research & Engineering people, I neglected to give it to you. It is our assumption that John Cooley wrote this letter and sent it to the New York office in order to put it on the record in view of our secrecy agreement with them.

I enjoyed seeing you again last Friday. Once again let me congratulate you for another splendid job of explaining our position on the lead alkyls.

Best regards,

R. K. Scales
