No. 3000 Series PACKLESS VALVE consists of a seamless metal Syphon bellows that forms a leakless connection between the valve disk and the valve body. Valve is available with stainless-steel bellows and stainless-steel body for a corrosive service. Bodies are also available in bronze, cast iron, cast steel or malleable steel or mending. In either pressure or vacuum service. In the standard type, the new valves are applicable to temperature ranges up to 300 F and OS & Y construction for temperatures up to 700 F. Special construction makes the valve suitable for temperatures up to 1200 F. Valves come in sizes 4 up to 3 in. with screwed, welded or flanged ends. Dept. PV, Fulton Syphon Div., Robertshaw-Fulton Controls Co., Troy, Ga. Knoxville, Tenn.

SPACER CAGES entrain required air for secondary combustion in gas-fired immersion type heating tubes, the maker claims. Cages are furnished separately or in ready-for-installation assemblies complete with mixers and associated equipment.

Atmospheric coil cage has a gas control low-pressure injector, flame-retaining burner

DIRT · WATER · COLLOIDAL CARBON

The De Laval "Puri-Filter" combines the De Laval "Uni-Matic" Oil Purifier and Fram "Pilcon" Filters. Because the combination unit gets rid of all contaminants down to one micron in size, and likewise keeps the oil completely free of moisture, it is the most effective means ever devised for protecting Diesel engine bearings.
