ASBESTOSIS RESEARCH COUNCIL

c/o TURNER BROTHERS ASBESTOS CO. LTD.,
P.O. BOX NO. 40,
ROCHDALE,
ENGLAND.

Ref: SH/GMH

4th May, 1966.

Mr. Karl V. Lindell,
Canadian Johns-Manville Co. Ltd.,
P.O. Box 1500,
Asbestos,
QUEBEC,
Canada.

Dear Mr. Lindell,

Further to recent correspondence between Mr. J. V. Lindell and yourself, I have been asked to inform you that the application of your Company for membership of the Asbestosis Research Council was discussed at a meeting of the Management Committee on 14th April.

The Committee confirmed that under the present Constitution your Company is eligible for Associate Membership only, the terms of which were agreed as follows:-

1. Associate Members would be officially recognised as being associated with the work of the Council.
2. They would receive a full copy of the Annual Report, exclusive to Members of the Council.
3. They would receive pre-prints before publication of scientific or technical papers covering research carried out under the auspices of the Council.
4. They would receive without charge reports published by the Council from time to time which are of general interest to the industry. Non-members would be charged for these.
5. The basic subscription for Associate Members has been fixed for the time being at £250 per annum. Any additional contribution towards the costs of the Council's research work would be welcome and would appear in the Annual Report.

*Roger - Please let me know what action you want
me to take.
I suggest you proceed to higher & further
associate membership level of £500 or £750.*

If you agree to these terms, I am asked to say that the Management Committee would welcome a formal application for Associate Membership, but would request that the application be made in the name of your Parent Company. If this were agreed, the Council would accept whoever John-Manville Inc. cared to nominate as their correspondent.

I gather that you are not unacquainted with the work and structure of the Asbestosis Research Council, but I will be pleased to supply any further information you may require.

We have heard indirectly from correspondence between Mr. Burnett and Mr. Bateman that the Quebec Asbestos Mining Association are considering applying for Associate Membership of the Council. It was agreed at our meeting that if the application were pressed, the Association would be admitted on the same terms as those outlined above, but we felt that we would prefer to exchange information with the A.M.A. Research Association when it becomes established. All this is very tentative of course, as we have yet had no official approach from the A.M.A., but I thought it would be of interest to you.

Yours sincerely,

S. Holmes
