

HOW TO APPLY FOR MEMBERSHIP

The real accomplishments of life are usually measured by the service one has rendered to his fellows and the true cultural refinement of mind, the finest sense of personal and professional ethics, factors transcending all material elements in what man calls "success," are developed through association with those of high ideals and cherished ambitions in the same field of activity. THE AMERICAN SOCIETY OF HEATING AND VENTILATING ENGINEERS offers to him whose work is definitely within its province, an opportunity for such association and an opportunity for real service to his profession.

Every man in the heating, ventilating and air conditioning profession needs the Society—

- 1—Because of the contacts that it brings through national and local meetings.
- 2—Because of the information supplied by Society Publications.
- 3—Because of the opportunities that research reveals in new applications for engineering services and equipment.
- 4—Because of the satisfaction to be derived in contributing to human comfort and well being.

A Candidate must make application on the printed form "Membership Application" which is available at the headquarters office or from Chapter Officers and members. A statement of qualifications and engineering experience is required and four members must act as sponsors except under certain conditions noted in Article B-III of the By-Laws.

Initiation Fees for 1942 are: Members and Associate Members \$10.00; Junior Members \$5.00. The Initiation Fee must accompany application.

For 1942 the annual dues of the Society are: Members and Associate Members \$18.00; Junior Members \$10.00; and Student Members \$3.00. Dues of new members are pro-rated on a quarterly basis.

ARTICLE C-II—MEMBERSHIP

Section 1. Persons connected with the arts and sciences related to heating, ventilating or air conditioning are eligible for admission into the Society.

Section 4. A Member shall be thirty (30) years of age or over and shall be a person of experience in the science of heat transfer in its application to the art of heating, ventilating or air conditioning, and shall have been in active practice of his profession and in responsible charge of important work for five (5) years and shall be qualified to design as well as to direct such engineering work.

Section 5. A Junior Member shall be a person over twenty (20) years and under thirty (30) years of age, who has been actively engaged in the work of heating, ventilating or air conditioning for three (3) years, or is a graduate of a school of engineering of recognized standing.

Section 6. An Associate Member shall be twenty-five (25) years of age or over. He need not be an engineer, but must have been so connected with some branch of engineering or the art of heating, ventilating, air conditioning or the industries relating thereto, that he may be considered as qualified to co-operate with heating and ventilating engineers in the advancement of professional knowledge.

Section 7. A Student Member shall be a person between the ages of 18 and 25 years, who is regularly attending courses in an engineering college or technical school at the time of applying for membership.
