

AUTHOR'S INDEX

Kinsinger, M. H. Motor and pump repairs go hand in hand. *326.

Kohl, F. S. When to use steam turbines for mechanical drive. *328.

Korn, Arthur H. How to determine reliable air-flow data for design of dust systems. *327

Kraus, Milton N. Calculating slipring-potential resistance of sliprings. *329

Lewis, George W. How to stop pond in a Caisson engine. *408

Underground waterproof concrete tank. *408

LARSON, W. L. Rebuilding blades salvages old steam turbines. *334.

Les, Albert. Series of films reduce pipe erosion. *374.

Levin, George E. New service meets the fleet highway. *468.

Lee, W. I. How to choose the proper wire-rope conductor. *335

Liffland, David. The strength of America. *1

Livengood, Edward T. Troubles with steam pumps. *337

Logan, J. R. Why does one cooling tower perform better than another? *338

London, W. F. Feedwater treatment removes troublesome entering matter. *480. Steam plant modernized with eye toward future expansion. *338.

Lyons, C. Turbine-generator exciter keeps pace with load changes. *339

MAHER, James P. Puller bars safely remove piston-rod heads. *704.

Martinez, B. J. Card kits keep track of equipment inventory. *340

McArthur, R. D. & O. G. Huhs. Rebuilt steam turbine modernizes this twenty-year old power plant. *341

McCabe, J. C. & L. N. Ravley. Cut smoke by improving combustion system. *342

[Data can be made to cut smoke.] *342

Proper hand firing makes no smoke. *486.

Prevent dirt and moisture from entering to operate smokestack. *344

Want your overfed stack to be smokeless? *348

What part does pulverized coal firing play in air pollution? *349

McCabe, J. C., J. H. Taylor & B. A. Strout Puda and firing. *718.

McClammy, Herbert. One of South's largest installations. *349

McFarland, Q. L. Liquid rheostat gives smooth control. *350

McKay, Donald H. Shock absorber reduces maintenance. *351

Meville, J. W. Top pound found in a Corliss engine. *486

Mervin, J. Let magnetic separators remove tramp iron. *352

Midbrook, A. T. & A. D. Menro. Topping stretches boiler life. *353

Miller, T. E. Design steps on clip board aid drawing. *354

Moore, D. R. Refinery power expansion. *376

Moore, D. R. & A. T. Midbrook. Tepping stretches boiler life. *354

Moore, M. O. How to get the most out of the valve. *357

Morris, A. J., D. Veder & H. Y. Carbonous. Removal of sludge in a sludge-blanket bottom receiver. *359

Mullin, William. High-pressure boilers save cost reheatng and topping turbines. *670

Mullin, William. Saving steam from curing cylinders. *360

Memford, W. C. Vertical turbine pumps put *411

Murphy, John B. Compression rings extend steamplant life. *360

How to top pound in a Corliss. *486

Neyens, F. W. & A. R. Pettit. Use of house turbines make waste water of Philadelphia's Southwest Station. *361

NARDONE, PIO. Section submergency controls condensate pump discharges. *460.

Newman, G. W. Electronic control for industrial machinery. *362

Newman, L. E. Standardization of electrical turbines is coming. *413

Niklasen, M. A. New service meets the fleet highway. *468.

Norman, Earl. Can I turn down a squirrel-gear rotor? *377

Nusley, L. L. Guyton Station takes on load. *483.

O'BRIEN, E. Troubles with steam pumps. *337

O'Connor, J. J. Circuit protection. *403.

Okroyd, O. Power-factor calculations made easy. *379

Omern, Henry. Ward-Leonard system assures exact speed control for dc motors. *484.

Oppenheim, Irving. Way to remove sluffing. *718.

PAPENBACH, MAX. Inductive kick checks motor trouble. *363

Page, S. C. Troubles with steam pump. *666.
