Mr. Paul Kuhnen
Industrial Hygiene Dept.
Chrysler Corp.
1200 Chrysler Drive
Highland Park, MI 48228-1919

Dear Mr. Kuhnen:

Enclosed are updated copies of MSDS for the various types of brake linings supplied by AlliedSignal Friction Materials. Main changes are to show the Troy, Michigan location; local phone number for contacts; and addition of a line to the ingredients list for NON-hazardous components. The MSDS types are:

- Organic Disc Pad, Non-Asbestos
- Semi-Met Disc Pad
- Organic Segment, Asbestos Free
- Low-Met Disc Pad, Non-Asbestos
- Organic Segment, Asbestos
- Organic Disc Pad, Asbestos

The latter are not listed individually, since they range for every formula and are specific to the part you receive. If you need those identified, send us a note of the part number and edge code for the part you are receiving, and I will send a list of the non-hazardous components along with a concentration range for that type of formula.

Regards,

Andris Staklis
Principal Engineer
