FRED C. DEHN, Director of Environmental Affairs
Chemical Division

December 27, 1978

Mr. A. C. Clark
Vice President, Technical Director
Manufacturing Chemists Association
1825 Connecticut Avenue, N.W.
Washington, D.C. 20009

Dear Mr. Clark:

PPG Industries, Inc., will complete their obligation and participate in this third and final year of the vinyl chloride research program at the University of Louisville.

Since the objectives of early cancer detection are now beginning to extend beyond those induced specifically by vinyl chloride monomer, a broader based financial support appears appropriate should this year's effort indicate a desire for continued MCA support. I recommend that MCA require the University of Louisville to present a comprehensive seminar covering this work in its entirety to MCA and the supporting companies as part of their final report.

Sincerely,

Fred C. Dehn
