Robert A. Kehoe, M.D., Director
Kettering Laboratory of Applied Physiology
University of Cincinnati
College of Medicine
Ketlab, Cincinnati

Dear Doctor Kehoe:

We appreciated your letter of October 10th in which you gave us such detail and helpful information regarding collection of samples for lead determination.

Will you kindly send us fifteen large containers for urine samples, five containers for spot urine specimens, fifteen tubes and needles for collection of blood specimens and five containers for feces specimens? We shall be very happy to supply you with pertinent data concerning all samples sent.

Please send all bills to the above letterhead address and directed to my attention.

Just before leaving the Dye Works, Doctor Evans and several of us completed a study in conjunction with you and Doctor Machle on the value of vitamin C to workers in tetra-ethyl lead. Since I have never heard anything further concerning this I should appreciate your comments when you have the opportunity to write, as I personally spent a tremendous amount of time and energy making this study.

Thanking you for your very kind help and attention regarding our lead problems here.

Yours very truly,

P. S. CUSHING, MANAGER
