KONICIDE CLUB MEETING

Ans. 1/4/35 D.H.

The KONICIDE CLUB will meet Sunday and Monday, January 13-14 in Washington, D.C., care of Dr. R.R.Sayers, Office of Industrial Hygiene, U.S.Public Health Service.

This promises to be an unusually important meeting and like our previous meetings, will be entirely informal and strictly private. It was impossible to fix the dates until today.

The program is in the hands of Sayers et al. and has a direct bearing on the forthcoming conference at the Mallon Institute. Among topics to be discussed are: (1) adoption of roentgenological changes, etc. as set forth in the Nov. 18, 1934 meeting at Philadelphia by Sayers, Pancoast, Pendergrass, et al.; (2) recommended procedure in dust control; (3) recommended procedure in medical control; (4) presentation by the P.H.S. of the results of their recent anthracite studies; (5) presentation by Miller and Sayers of their data on the intraperitoneal injection of dusts.

This list is quite unofficial and will be changed by Sayers as he sees fit. Please write him at once giving your own suggestions and arranging direct with him for your hotel reservations. There will be an informal but cheery Dutch treat dinner on either Sunday or Monday evening.

Philip Drinker.
Secretary.
