T.A.C. and Leeds University

The Leeds University Physicist referred to, Mr. J.K. Shepherd's letter of the 27th February to Mr. Neve, is the Head of the Physics Department, Professor Preston.

The building in question is a new Physics Department, and Professor Preston, as a result of recent publicity, has said that he does not wish his students to be exposed to asbestos dust released into the atmostphere during the handling of the A.C. sheet during building operations, and when it might have to be removed later for maintenance work.

It now seems likely that Professor Preston will be persuaded to meet Mr. Byrom and myself in the presence of a representative of the Architects.

S. Holmes.
