Chris,
I will be looking through the Canofile system today and collect the EB data in our archives. The Canofile system has been having some operational problems lately and the repairman was working on it yesterday. Hopefully I will be able to do some searching today.
Regards,

Bruce

Bruce,

Do you have or know of any data to provide to Bill Hayes?

Christine Baldridge

Subject: EB IH data

I'm not quite sure who to address this note to so please forgive me and ignore if not appropriate. Also please forward to appropriate person if you know who it is. This request is coming from the CMA E-series panel. We are looking for available plant IH data. We are assuming our numbers are typically low but would like to confirm. Part of the driver for this is that the NTP bioassay results could be available as early as June or July and we want to be prepared (and understand) our exposure situation both in our plants and as much as possible with our customers. Any Dow data will be kept as confidential and aggregated with other producers' data by CMA staff.

Please respond by May 9 if possible. If you are not the right person please let me know by e-mail. Thanks for your help

Tom, if you have any IH data on EB please let me know.

I sent this person a note saying you guys would probably be the right people to talk with on this. Bruce or Harvey, could you follow up with him on this?

Thanks,

Julie A. Broome
