

1 mesothelioma.

2 For the general public, of course, it is  
3 1.0; and for automobile repair, which means garage  
4 mechanics, the risk is about .65.

5 Q Let me ask you that -- a question about  
6 that.

7 That is below 1, correct?

8 A Yes. But whenever you do a study of a few  
9 hundred people, it is not going to be exactly one,  
10 especially this is a small study.

11 Q Okay. The smaller the study, the more  
12 chance of variability then?

13 A Yes. When you are talking about a small  
14 study, the answer may fluctuate a little.

15 Q Okay. What kind of study was this?

16 Was this a case control study?

17 A The McDonald study was a case control  
18 study. This study was also a case control study.

19 Q Okay. There is a third study on the board,  
20 and that is a National Cancer Institute study.

21 A Yes. This study was done by Dr. Spirtas,
