

SHIFT TEAM TWO
SAFETY MEETING
MARCH 29, 1989

I. SAFETY ORDER S-125 - ASBESTOS

- A. Jerry Smith opened the meeting with an introduction of the Safety Order on Asbestos. He went into a discussion of the properties of asbestos and its uses. Also discussed were the potential health hazards involved with exposure to asbestos and the permissible exposure limit (PEL).
- B. Ron Henderson lead a discussion on the general practices involved in handling asbestos as written in S-125.
- C. Jimbo Ryan talked about the definitions contained in the Safety Order.
- D. Ray Malonson explained the DPMC work practices involved as defined in the Safety Order.

ACTION ITEM: Jerry Smith volunteered to contact the Industrial Hygiene Department and inquire about the BPA Control Room ventilation requirements regarding asbestos fibers.

- E. Ray Malonson also discussed the requirements for demolition and renovation of asbestos materials as contained in S-125.

ACTION ITEM: Ray Malonson agreed to notify the Industrial Hygiene Department concerning the asbestos removal which took place in the BPAM area approximately two years ago and request the air monitoring results.

- F. Enrico DeSalle discussed the sections contained in S-125 concerning asbestos disposal and also the section involving Annual Medical Exams and Employee Training.

II. NEAR MISS REPORTING

Jerry Smith explained the DPMC requirements for near miss reporting. He also gave a definition of a near miss and presented the "Accident Prevention" form which is to be used for reporting of near misses. The group also viewed a film on near misses.
