No. 24 Former medical director of Abex, was Dr. Hamlin. He held a position on an Industrial Hygien Foundation Medical Committee for 3 yrs. starting in 1552.

No. 30 Abex did not conduct any tests or experiments to determine whether or not asbestos fibers in its products would become airborne upon any foreseeable application of said products.

No. 31 Abex is unable to say when it "first became aware of the hazardous potential of asbestos" Abex' med. dir. (Knoch) obtained knowledge of the hazards in 1963.

No. 35 Here Abex admits that Excessive exposure to Amosite, crocidolite and chrysotile asbestos fibers over an extended period of time is associated with lung cancer.

No. 45 The following employees of Abex were involved in answering these interrogatories.

Dr. F. W. Knoch
C. B. Mallory
T. F. Merkel

List of interrogatories not answered by Δ because the terminology "~~insulation~~ asbestos containing insulation products" was used instead of "asbestos containing brake lining products."
