

Mr. R. J. Kotnour

May 14, 1969

Mr. T. C. Ford

Mr. S. D. Daniels

Attached is a copy of a news release by the DDT Task Force, NACA which questions the validity of DDT residue measurements because of the possibility of PCB presence.

Also attached are several articles from the San Francisco Chronicle indicating that the California Senate has voted to consider legislation against DDT and other pesticides. The May 8 article names parathion, so we may expect trouble of our own soon.

Richard J. Kotnour
