Boston 15, Massachusetts

Dear Phil:

I have your note of May 22. A question has been raised as to whether your proposal to list the A.I.H.A. on the inside of the Journal of Industrial Hygiene and Toxicology cover meets the Board of Director's requirements of "the A.I.H.A. would be mentioned on the cover". It would be nice, of course, to have mention made on the outside of the cover. I am awaiting the opinion of Warren Cook's committee on this point before giving you our approval. As far as the cash is concerned we understand that the Journal of Industrial Hygiene and Toxicology is solvent for this year and we plan to investigate advertising as a source of revenue before taking any other steps. The other points in your letter of May 2 sound OK to me.

Sincerely yours,

Frank
F. A. Patty,
President
