D R A F T

(To customers who returned signed copy of March 5, 1972 letter.)

Dear Sir:

In March, 1972 I requested confirmation that you had discontinued the use of all Therminol® FR series heat transfer fluids in your plants. I have received your response that usage has indeed been discontinued. Your cooperation and understanding is appreciated.

Recently the Food and Drug Administration published in the Federal Register a final rule making order regulating the presence of polychlorinated biphenyls (PCBs) in establishments processing animal feed, food-packaging material and food. I have attached a copy for your use. As you know, polychlorinated biphenyls (PCBs) are present in Therminol® FR fluids.

It seems appropriate at this time that you thoroughly review your procedures and inspect your facilities to insure that your operations are in compliance with this new regulation.

If we can be of further service in this matter, please do not hesitate to let me know.

Sincerely,

C. Paton
Product Manager,
Heat Transfer, Dielectrics
and Process Fluids
