DOCUMENT DESCRIPTION: Book Review - Air Pollution Manual

James H. Botsford, Jerome R. Cox, Cornelius L. Coyne, Allen L. Cudworth, Leo G. Doerfler, Vaughn Hill, Paul Michael, Frank A. Patty, P.J. Whitaker, and George Wilkening. The second edition was the first manual to be sold at a pre-publication price, which proved to be an advantageous sales method.

Air Pollution Manuals

An Air Pollution Committee was appointed in 1955, with George D. Clayton named its chairman. In 1959 Clayton advised the Board that a book concerning air pollution evaluation had been completed. The 13-chapter *Air Pollution Manual, Part 1, Its Evaluation* was published in 1960. It was planned as part of a series, published in the same format as AIHA's noise manual, with the same rust-colored cover.

Air Pollution Manual

This latest venture was well received and sold well. *Library Journal* (considered the most accredited publication in rating technical books) recognized it as one of the 100 best technical publications of that year. Authors of the first edition were: George D. Clayton, chairman, Lester V. Cralley, Paul M. Giever, Leonard Greenburg, Kingsley Kay, Norton Nelson, Jack C. Radcliffe, Harry F. Schulte, J.S. Sharrah, Ralph G. Smith, Arthur C. Stern, Amos Turk, and R.C. Wanta. It was revised in 1972. Chairman of the second edition committee was Paul M. Giever.

A subsequent Air Pollution Committee, with Knowlton Caplan as chair, began work on a sequel to the guide air pollution evaluation guide. In 1969 *Air Pollution—Control Equipment* was published. It also had 13 chapters.

Respiratory Protective Devices Manual

In 1958 the Respiratory Protective Equipment Committee was appointed, with Edwin C. Hyatt as chair. This committee, in cooperation with the American Conference of Governmental Industrial Hygienists (ACGIH), worked on producing a manual to be published in the same format as previous AIHA manuals. The AIHA Board approved underwriting the book's expenses. After all costs were recovered, any

Andy + George.

See if you can come up with this and see if it says anything about asbestos. One of the authors was Lester Cralley of Alcoa.
