DOC#: PFIZ054

DOCUMENT DESCRIPTION: Legal - Answers to Plaintiffs' Interrogatories

Plaintiffs' Interrogatory No. 5:

When did you or your predecessor(s) in interest first manufacture each and any product made with asbestos or asbestos components and in answering, if you have manufactured more than one such product please identify and give the date of initial and final manufacture of each such product, a description of each such product including the percentage of asbestos in each by type and the intended marketable use for each such product.

Quigley's Response:

Quigley began compounding Insulag, an asbestos-containing product, in approximately 1935. Insulag was an insulating refractory cement that contained approximately 9.7% chrysotile asbestos fibers in its dry form and only approximately 5.82% asbestos when mixed with water for application (60% Insulag, 40% water). Quigley discontinued the manufacture of Insulag as of January 1974.

By way of further answer, Quigley states:

Product	Description	1st Sold	Last Sold	Content
Insulag	Refractory Cement	Approx. 1935	3/31/74	5.82% wet; 9.7% dry
Insulbox	Precast Insulag	Approx. 1935	Unknown	5.82% wet; 9.7% dry
Insulag SOF	Refractory Cement	Approx. 1970	3/31/74	14.7%
Insuline	Refractory Cement	1940's	Approx. 1970	14.7%
Panelag	Refractory Cement	Mid-1940's	3/31/74	20%
Panels	Precast Panelag	Mid-1940's	3/31/74	20%
Panelbond	Refractory Cement	Unknown	Unknown	Unknown

Product	Description	1st Sold	Last Sold	Content
Waterproof Cement	Cement	Approx. 1959	3/31/74	6%
Damit	Plumbers Joint Sealant	1940's	Approx. 1970	11%
