POWDER COATINGS

(Ref. R.E.S. to M.D.Y. 8/17/72)

We understand that you may now want to use FEP powder containing about 5% Triton X-100.

We do not feel that the addition of the Triton X-100 will change the overall toxicity of this material to a degree that would necessitate any change in the label warning suggested in my August 17 letter. (R. S. Waritz concurs in this opinion).

E. E. SWAIN, JR.
