

Questions: To ASK AT I.H./MED. MEETING. GRAN

1. How should the following OSHA Requirements be satisfied while dealing with ~~subcontract~~ contract maintenance labor.

a. Determination and measurement of exposure, should the contractor be required to perform?

~~The~~ b. The law requires that engineering controls ^{no} be instituted to reduce employee exposure. ^{no liability.} How would this relate to UCC if only the contract labor is over exposed? ^{Under Workman Comp we could be sued}

~~The~~ The contractor could insist on work ^{no.} the way practice to reduce exposure. Should we be doing in this be included in an agreement OK as long as ^{or contract?}

^{BTR doesn't insist} c. Should the contractor perform all ^{They should, but} the required measurements, record keeping, ^{we have no} ~~and medical~~ information and training, ^{responsibility} and medical aspects required by OSHA? ^{as make them}

Should UCC insist that this be done? NO

Do we come under any liability if BTR do not monitor their people

PLAINTIFF'S EXHIBIT

UC-1751

2. What role does UCC take in relation to a subcontractor brought in by our prime contractor. Who insures that OSHA requirements are followed by the subcontractor? UCC or Prime contractor? Who is liable if a violation occurs?

Liability from OSHA
Liability from a lawsuit

The prime contractor or if not supervise the people we are responsible

3. Do we liable ourselves by providing
no! the contractor with all of their safety
protective equipment? (equipment is approved)

By this, do we assume a greater
no! obligation and responsibility in relation to
OSHA requirements by assuming one
portion of the OSHA requirements?

We provide all their tools etc.

4. Should we require our contractor to
perform preplacement audiograms or should
we perform this service for our contractor under
agreements in the contract?
(and other tests for silica etc.)

emotional problem as UCC
check their people and BIL don't

(obtain)
5. Who supplies the medical opinion as to a worker's ability to wear respiratory protective equipment? The contractor or HSE?
If we supply the personnel protective equipment does this obligate us to determine a worker's ability to wear it?

Emergency squad personnel
what is liability if person wears respirator and is ~~you~~ injured doing so.

In the case of emergency squad we are totally ~~responsibly~~ responsible since we supervise these people directly.

6. What is our responsibility relating to OSHA requirements to contractor and workers of companies such as: Phone co. employees, computer repairmen, typewriter and Xerox repairmen, power company etc? ~~only~~ no responsibility under OSHA, but can be sued if they are hurt by something we created.

"People who are transit employees, turbine people, hydro blasters, same - ~~then~~ ^{the} are responsibility of ~~the~~ their employer under OSHA

7. We have B&R employees on our emergency squad.
Should we have medical proof that these people can
wear respiratory protection equipment.

yes we are totally responsible

We should not apply feasible controls
to O₂ for contract people.
