Dear George:

Thank you for your letter of December 23 regarding the Amosite and Anthophyllite Asbestos from Commonwealth & Overseas Asbestos Corporation.

North American Asbestos are taking care of us very adequately at the present time. However, if the Technical boys approve Commonwealth's material, it will obviously be good to have a second string to our bow. However, I understand from Ted Jago in the Steel Mill Division that they have not been able to spend much time evaluating the material from Commonwealth & Overseas Asbestos Corporation.

Very truly yours,

FOSECO, INC.
