066-VALVE SHIM DISPLAY AND MERCHANDISER

3-4358

RACK ONLY — 3-4359

3-4358

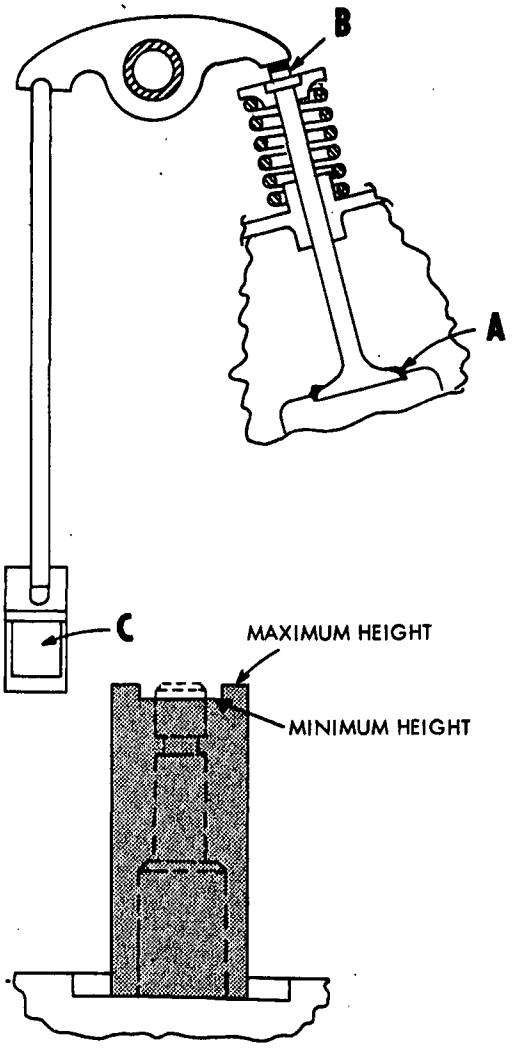

THE NEW BALKAMP VALVE DISPLAY AND MERCHANDISER contains a fast moving stock of valve shim springs to service virtually all passenger cars, trucks and tractors. Wall or counter top display neatly organized for quick selection and easy restocking, PLUS one valve spring shim gauge.

CONTAINS:

066-VALVE STEM HEIGHT GAUGE KITS

3-4351 — 3-4352

Valve stem height gauges determine proper Valve Stem length much more accurately and in less time.

In grinding Valves, material is removed from both the Valve Face and the Valve Seat at point (A). Thus the Valve Stem extends further out of the Head, resulting in less Hydraulic Valve Lifter Plunger (C) clearance.

Some car manufacturers do not make provision for adjustment of the Rocker Arm assembly, therefore it is necessary to "Grind Off" the tip (B) of the Valve Stem to maintain the proper Valve clearance.

VALVE STEM HEIGHT GAUGES determine the allowable amount of "Grind Off" required to maintain the proper Hydraulic Valve Lifter clearance.

These gauges indicate the maximum and minimum length of the Valve Stem to assure the mechanic of proper Hydraulic Valve Lifter clearance.

(See Page 13 for Application Chart)
