A2SE - H. W. HAYDEN

S. O. MORRISON

B2NK - W. B. PAPAGEORGE

B2SA - J. STAPLETON

A2SF - R. G. WITTERSCHEIN

All Chlorinated Polyphenyl product labels include the waste disposal statement shown on the attached Aroclor 1260 product label. I question the decision to withhold the offer from any customer. If any clarification is needed on exported containers, I suggest adding the statement "In case of leak or spill, contact your Monsanto agent." If provisions are made for proper incineration in other areas our agents could provide better options. Bill Papageorge is investigating other leak or spill remedial action possibilities that Monsanto agents might suggest to forestall careless extension of problems.

The signal word WARNING shown on the PCB text attached to your memo should be changed to "Notice" or "Attention." Do not use the words Warning, Caution and Danger as they are reserved for relation with physiological hazards.

In view of these comments, I am holding up action on elimination of the waste disposal paragraph from ex-U.S. labels.
