From Tom Grumbles
Date July 16, 1982
Subject MATERIAL SAFETY DATA SHEETS

Enclosed are the first drafts of MSDS's for the "Alfonic" Alcohols. Please review according to the distribution below.

As with the "Alfol" much of the information on these sheets is the same. I need comments on whether we should include a statement concerning residual ethylene oxide content of these products.

Enclosures

Distribution:

Sid Pitts - Sections 4,5,8
Dr. Drumwright - Section 5
Bill Broddle - Section 5
Michele Malloy - Legal
Susan Litzau - Legal
Carl Kerfoot - Sections 2,3,6
Bill Groves - Section 9
Joe Ledvina - Section 7

8-3-82

1. These materials are not major fire hazard
2. From past experience we know that trace amounts of ethylene oxide may be present in material and that this can migrate to vapor space of storage vessels.
3. Higher melt material may be handled heated and thus present burn potential.
4. Spills if washed cause gross quantities of subs.
