A No. And if you will review the report, it said that those levels, because of the very severe circumstances that we put that through, were too high to appropriately measure.

And under those circumstances we put the elements directly in the stream of the grinders so it collected too much.

Q Now, you do recall that you have reviewed Mr. Grewe's transcript and deposition in this case; is that right?

A Yes, sir.

Q And you --

A There were two editions of it.

Q Yes, sir. And you do recall reading that Mr. Grewe was involved during his years in grinding, sanding, beveling, and chamfering original brakes, do you recall that?

A I am a little bit at odds because I am not entirely sure if all of that came from him or if it came from somebody discussing what he had done and I am not sure whether he stated that or someone else
