East Orange, New Jersey 07018

Dear Mr. Kernan:

Your request for label analyses has been sent to me for reply.

Du Pont 65-3035 Preparakote[®] Lt. Gray Primer Surfacer has the following approximate composition by weight:

Prime Pigments (<0.5% lead)	~20%
Extender Pigments	~30%
Resins	~10%
Aliphatic Hydrocarbon Solvents	~15%
Aromatic Hydrocarbon Solvents (Benzene Free)	~25%
	100%

Du Pont 91-6731-H White has the following composition:

Pigments (<0.1% lead)	~30%
Resins	~35%
Aliphatic Hydrocarbons	~15%
Aromatic Hydrocarbons (Benzene Free)	~20%
	100%

Du Pont 93-57332 Green is an obsolete formula for which information is not currently available. Ready mixed aluminum was not identified by any code. However, I suspect it is simply a suspension of aluminum flake in a hydrocarbon solvent.

If I can be of further assistance to you, please do not hesitate to contact me.

Very truly yours,

W. W. Miller
Toxicity Coordinator
