MARSHALL DEVELOPMENT LABORATORY SUPPLEMENTARY
RELEASE LETTER #2013-C

CONVERSION OF DU PONT SPRAY PAINT GLOSS WHITE, FLAT WHITE
AND HUNTER GREEN FROM COMPETITIVE LACQUERS TO "DUCO*"
LACQUERS

The Marshall Research Laboratory favors approval of part of this proposal to replace purchased Gloss White and Flat White in the Du Pont Spray Paint 243 Line with nitrocellulose lacquers of our own manufacture.

However, a recommendation is made to delay release of the Hunter Green aerosol paint until a toxicity opinion is obtained. The product may be applied on objects accessible to children; it contains 20% W-679 Chrome Yellow (i.e. 12% lead by weight on the paint solids), and it has questionable flexibility and adhesion.
